

1990 IS EXCITING YEAR FOR ALUMNI ASSOCIATION!!

ACAPULCO CLINICAL UPDATE 1990

A record number of alumni and non-alumni attendees participated in the **Alumni Association Clinical Update** in Acapulco, Mexico, March 18-25, 1990. The event was held at the Pierre Marques, a Princess Hotel guest property overlooking the ivory sands of Revolcadero Beach on the Pacific Ocean in Acapulco. A total of 167 people were in attendance, including spouses. An outstanding group of speakers from the **University of Washington** and other well-known departments presented information which the attendees found both informative and stimulating.

The alumni participants enjoyed a chance to renew acquaintances with former classmates and other alumni, as well as make new acquaintances of other orthodontic professionals

from all parts of the world. Each morning was filled with formal lecture sessions with the afternoons left open for opportunities of informal discussion. While there were planned social events for a number of the evenings, the balance of evenings were left open for individualized social planning.

The hotel facilities offered prime golf conditions and participants enjoyed sites at both the Pierre Marques and adjoining Acapulco Princess. Other sports and activities included tennis, swimming, tours into Acapulco, enjoying the sun, and having a good time relaxing.

(See photos "Memories 1990")

RECORD ATTENDANCE FOR 1990 ALTON MOORE LECTURESHIP

Record attendance of 132 staff, students, and faculty

Dr. R.G. "Wick" Alexander

The tenth annual Alton Moore Lectureship was held at the Olympic Four Seasons Hotel in Seattle, WA on Friday, June 8, 1990. Dr. R.G. "Wick" Alexander, DDS, MSD, Clinical Professor at the Baylor Dental School in Dallas, TX was the guest speaker. He gave two exciting lectures. The one for the morning session was titled, "An Innovative Approach to Non-Extraction Treatment Combining Orthopedic and Orthodontic Forces". In the afternoon his speech was entitled, "Treatment and Retention for Long Term Stability". Dr. Alexander is author of the textbook "The Alexander Discipline", which has been translated into Japanese, Korean, Italian, and Chinese. Dr. Alexander is a Diplomate of the American Board of Orthodontics, A Fellow of the International College of Dentists, and a Fellow of the American College of Dentists. He received the Milo Hellman Research Award from the American Association of Orthodontics for his study on Scoliosis and the Milwaukee Brace. He also received the first Dewel Clinical Award from the American Journal of Orthodontics and Dentofacial Orthopedics for his article "Differential Diagnosis and Treatment Planning for the Adult Nonsurgical Orthodontic Patient". Additionally, he has maintained a practice for orthodontics in Arlington, TX for the past 25 years.

In addition to the presentations by Dr. Alexander, the 1990 graduate students gave summaries of their research efforts. A special significance for Dr. Alexander was the presentation by his own son, Dr. **Chuck Alexander**, who graduated with the Class of 1990.

A buffet luncheon was enjoyed by all and gave opportunity for the renewing of friendships of fellow alumni and meeting the other non-alumni orthodontic professionals we were fortunate enough to have join us. (See photos "Memories 1990")

MESSAGES

MESSAGE FROM THE CHAIRMAN

Perhaps the question that I am most commonly asked by students, faculty, and alumni of other orthodontic programs is, "what is the U of W philosophy of treatment?" When I was first asked that question (probably as a recent graduate), I hemmed and hawed and then finally had to admit that I wasn't sure; I think I was a little embarrassed that I could not articulate the Department's philosophy: Today I can tell you I am very comfortable with my response to that question: our philosophy is to treat each patient as an individual. Our objectives are to establish a satisfactorily functioning occlusion, a healthy periodontium, and a pleasing dental and facial appearance.

When students first enter the program, they are usually frustrated by the variety of responses by our faculty to the same question. They get confused. They search for "the answer" or "the formula" that will allow them to make easy decisions. However, as experienced clinicians we know there are no easy answers. We treat individuals who present with incredibly diverse problems. I hope our treatment plans reflect this diversity.

In the clinic our students obtain complete records, diagnose the patient's problems, and prepare a list of treatment objectives (in consultation with the patient or parent). They list every reasonable treatment alternative with its advantages and disadvantages. Only then are they allowed to propose a treatment plan. We hope these clinical decisions are based on experience and knowledge of scientifically validated research. There is no room for dogma. Therefore, the obligation of our faculty is to stimulate our students to think, criticize, and question.

By the end of the program, I believe our students are comfortable with the idea that there are no simple answers or formulae that they can rely on to guide them in the practice of orthodontics. They realize that knowledge of basic biologic mechanisms and principles of diagnosis and treatment planning transcends knowledge of in-vogue orthodontic techniques. They realize they must be thinkers and problem solvers. This is the knowledge that will allow them to respond to the inevitable and desirable changes in our technical abilities. It is the result of treatment that is important, not necessarily the means. So when you are asked by a colleague, "What is the U of W treatment philosophy?", you can answer with pride that we treat each patient as an individual. We establish objectives and we draw on the depth and richness of our educational experiences to achieve them.

MESSAGE FROM THE PRESIDENT

The past year the Board of Directors has met on a regular basis with much enthusiasm towards prudent management on the **Alumni Association**. There has been good attendance at our meetings, which contributes greatly towards operating a better organization.

We teamed up with Peter Shapiro and faculty to provide two outstanding Alumni sponsored functions this past year:

- (1) The **Clinical Update in Acapulco** in March provided not only excellent orthodontic material presented by Alumni and faculty, but also great fellowship and comradery among the Alumni, as well as non-alumni in attendance.
- (2) The annual **Alton Moore Lectureship** in June recorded the best attendance ever! It was very befitting to have "Wick" Alexander as our guest speaker as his son Chuck was presenting his graduating thesis paper also.

Both of these meetings were very successful in creating excellent quality information for attendees, but both functions were not self-sustaining financially. It has been our goal to have the tuition income match expenses for any of our functions. Thus we find ourselves in a "catch-22" situation of trying to keep the tuition reasonable but yet anticipate present day costs and estimated attendance. Both of these are areas that cannot be pinned down to the last dollar.

It is the intent of our **Alumni Association** to maintain all contribution funds in an endowment fund that will support departmental research projects and equipment to aid in the implementation of these projects. It is our goal to have the interest from an endowment fund *totally* support these projects.

This year expenses from contributions have been used for:

- (1) Research projects for students
- (2) Equipment for the Department
- (3) Excess support costs (overages)
 - (a) **Clinical Update in Acapulco**
 - (b) **Alton Moore Lectureship**

It is not the intent of the Board to have the "excess support costs" be drawn out of the contribution funds. The Association's dues have been inadequate to sustain increased operational costs. The Board of Directors has been addressing our operational budgeting, and we have made the necessary dues increases, which you were recently mailed a letter on. We plan to raise dues to \$100 per year by 1993. We have decided to phase in this increase. The dues this year will be \$50, \$75 the following year and \$100 the year after.

I request that we have 100% of our alumni be dues-paying members so that the contribution fund can be solely used to sustain and enhance our Orthodontic Department.

RESEARCH 1990

The following is a summary of research efforts performed by the graduating students for this past year. Funding to assist in this research was provided by you, the alumni and your generous support in giving to the **Orthodontic Alumni Association**.

THIEN BUI Mandibular Incisor Extraction: Postretention Stability

DIANE DOPPLE An Investigation of Maxillary Superimpositioning Techniques Using Metallic Implants

JAY ZUROFF Anterior Open-Bite Malocclusion: A Ten Year Postretention Cephalometric of Orthodontically Treated Patients

CHUCK ALEXANDER Stability of Mandibular Constriction With a Midline Osteotomy

TOM POPP Pulpal Response to Orthodontic Tooth Movement in Adolescents: A Radiographic Study

DOUG RAMSEY The Effect of Le Fort I Osteotomy on Pulpal Blood Flow

I appreciate the continuing opportunity to work with the **Orthodontic Alumni Association** in an independent contractor/consultant capacity as your Executive Director. As part of my own business, I have significantly upgraded my computer equipment this past year. This entire newsletter was developed and created on this upgraded equipment. Additionally, my client listing includes a number of other long-term, as well as, new clients, in addition to the **Alumni Association**. I am involved in several areas of marketing, marketing communications, desktop publishing, and other consulting areas, in a number of varied industries, firms, and professions.

I especially want to thank Mimi Rice, wife of Alumni President, **Dave Rice** ('69), for her assistance in coordinating travel to Acapulco for the Clinical Update in 1990. Also I want to thank the staff of the Orthodontic Department for all of their help, both to the **Alumni Association** and to me personally. All of your help is greatly appreciated.

Carolyn Benjamin

BOARD OF DIRECTORS

During the past year the Board of Directors of the **Alumni Association** has accepted the resignations of the following directors:

Francis G. Jones ('59) - Wauna, WA
Fred H. Hassig ('89) - Paradise Valley, AZ
James C. Ellingsen ('85) - Spokane, WA
Diane Milberg ('76) - Jamul, CA

The demands of active participation on the Board requires a significant amount of time and involvement and with the active lives each of these alumni lead the logistics of commuting to Seattle and active participation was very difficult. The Board of Directors and the entire **Alumni Association** appreciate the amount of energy each of you were able to give to the Association. To each one of you thanks for your involvement.

Replacing one of the seats on the Board is **Bruce Molen** ('72). Bruce resides in Auburn, WA, with practices in Auburn and Enumclaw, WA. The Board of Directors welcomes Bruce in joining them in working to make the **Alumni Association** the best possible.

MEMORIES 1990

LET'S CATCH UP

We are continuing with this feature started last year. The feed-back has been unanimously positive that you enjoy knowing more about what is happening with each other. This column is *your column*, and to make it happen your help is needed. Some of you just dropped a note to say "hi", and I have included you in the listing so your fellow alums can stay connected with you. Some of you told me all sorts of things about what is going on with you. Some of you did not tell me anything about yourself but did tell me you were really anxious to read about everyone else.

I hope I have been able to represent you as you would like to the rest of the alumni. Please continue to help me with this venture and drop a note, call, or FAX. Send pictures of what is going on in your life that you would like your classmates to know about. Let me know about your interests, practices, families, *whatever* is going on. Thanks for your help. Please contact me at: Carolin Benjamin, 4016 92nd Avenue South East, Mercer Island, WA 98040 (phone 206-232-5186/FAX 206-236-1539).

ALFRED T. BAUM ('50) is still practicing in Los Angeles, CA and sends his greetings.

ROBERT KEMP ('52) in Seattle, WA is retired and says hello.

JOHN PHILLIPS ('53) is retired in Phoenix, AZ and is a Past President of the Arizona State Dental Association.

ROBERT TAYLOR ('54) is retired in Memphis, TN.

EUGENE SUPERNOW ('55) continues to practice in Marysville, WA.

GORDON JOHNSON ('55) is retired in Bakersfield, CA.

BLAINE CLEMENTS ('56) is retired in Menlo Park, CA and is the Secretary of the National Edward H. Angle Society succeeding Alton Moore (F). It sounds like he keeps busy with his 17 grandchildren though.

R. MORLEY DAVIS ('56) is practicing in Newport Beach, CA. On January 5, 1990 he married his new bride, Bonnie. Congratulations to the honeymoon couple!

STANLEY INOUE ('57) retired in November 1989 in Sacramento, CA.

LESLIE ERICKSON ('58) is with the College of Dentistry at the University of Nebraska in Lincoln, NB.

JACK RICHARDSON ('59) is retired in Beaumont, TX and sends his greetings.

ERIK PIHL ('59) is practicing in Mt. Vernon, WA and says hello. He became a Century Club member this past year.

GENE CAMPBELL ('59) is retired due to illness

and has moved from the state of WA.

ROBERT KELLEY ('59) is practicing in Seattle, WA. This past year he also became a Century Club member.

K.E. ELMAJIAN ('59) says hello from his practice in Palos Verdes Estates, CA.

ANDREW HOUG ('60) is practicing in Seattle, WA.

STANLEY GUM ('61) says the best new item for him is that his daughter, Dr. Mary Gum, completed her orthodontic training in 1989 at University of Pacific and has practiced with him in Monte Sereno, CA (near San Jose, CA) since October 1989. He says it looks like more golf time for him and a slow walk to retirement.

JIM MULICK ('61) is still loving orthodontics. At his Agoura Hills, CA practice he has converted 95% to speed appliance. He has been with UCLA 29 years and 26 years at St. Johns Hospital in Santa Monica, CA. This month he is starting with "Digigraph" Imagining to eliminate headfilms. He and his wife, Joyce, are still skiing and hiking and enjoying their three grandsons.

RONALD ROBBINS ('62) continues to practice in Tacoma, WA.

ROBERT HORTIN ('62) sends his

greetings from Sunnyvale, CA.

EDWIN WERLICH ('62) wants to say hi from his practice in Everett, WA.

FRANK BAIRD ('62) who is retired sends greetings from Wenatchee, WA.

DAVID TAYLOR ('63) says both yes and no when asked if retired. Since he still references his business address to be Canberra, Australia, it sounds like being retired is wishful thinking (??)

NORMAN CARSTENS ('64) is actively practicing in Grosse Pointe Farms, MI and sends greetings.

ROBERT SUTHERLIN ('64) opened and moved into a beautiful, new office in South Anchorage, AK in early 1990. His daughter, Kathy, and her husband presented him and his wife, Darlene, with a new granddaughter in March 1990. His son, Jon, achieved "Captain" status in both Twin Otter and Convair 580

with ERA - Intra Alaska Airlines in early summer. He has been active as a Director and Past-President of the Alaska Airman's Association. Additionally, he is active in the Airman's Alaska/Soviet cultural and educational exchange involving Aeroflot Airlines Training Institute personnel. Along with the formal events for this, he and his wife have hosted several

Peter Shapiro ('73) running Mercer Island Rotary 1/2 Marathon

LET'S CATCH UP

Soviets in their home. And last June he had the pleasure of touring several aviation training facilities in the USSR as a guest of Aeroflot Airlines.

GEORGE BLACK ('64) had an unusually wild summer with one future daughter-in-law beginning dental school this fall, one daughter starting law school, and yet another daughter moving to a new home in Federal Way, WA. All of these moves have taxed the fun time of he and his wife, Judy. However, when he wrote to me he was in his pickup truck towing his new boat on the way to go salmon fishing, trying to make up for some of the lost fun time! George practices in Moses Lake, WA. He tells us that Moses Lake is getting a bit of a reputation as a film location. Steven Spielberg made the film "Always" there the past summer, and 20th Century Fox attempted to do much of "Die Hard II" there in the winter but had to move on to Alaska and Greenland when the snow did not co-operate. He says Moses Lake has welcomed the movie companies who have invested millions along and around the airport, (which he indicates is the largest airport west of the Mississippi). The word is Moses Lake is the best location for airport/airplane movies in the world. In February 1990 the Fox Corp. contracted with George to lease his home to Bruce Willis and Demi Moore (at least he hopes it was her) for 3 weeks. Lack of snow moved them on in a week. George never met Bruce, but many of his patients did at the movies and at the Mission Ridge ski area. Previously he had been asked by the Spielberg group to lease his house, but a conflict prevented him from taking advantage of that opportunity, which he regrets and believes would have been fun as well.

ROBERT BENDZAK ('65) has a "full tilt" running practice in Seattle, WA with his daughters and wife, Dorene, working with him. One daughter, he reports, recently was highlighted in the PEOPLE magazine Summer 1990 Photo Extra Special as one of "The 50 Most Beautiful People in the World". He says she looks like her mother. (Page 125 - Gjeryl Bendzak age 26 - pediatric X-ray technologist.) In their spare time he and his wife spend time at their ranch and fishing resort in British Columbia - working. This past year he became a member of the Century Club.

TED THOM ('65) is busy with his practice in Klamath Falls, OR.

DONALD D. FRANTZ ('65) practices in Old Bridge, NJ and says he thinks he and his family have

Daniel Kennedy ('80)

attended all of the universities with "Washington" as part of their name. His son attended George Washington University and graduated with a BA degree and then attended Washington University in St. Louis, graduating with a M.B.A. degree. His daughter (with all the Frantz already attending all of the "Washington" universities) will graduate from University of Michigan with a BA in Economics, French, and Japanese.

JAMES DART ('66) is practicing in Pasco, WA and says hello. He tells me he has four married children and eight grandchildren.

FRANCIS FRASER ('67) sends greetings from his practice in Bellevue, WA.

PAUL DEES ('67) is active with his practice in Puyallup, WA.

ROBERTO JUSTUS ('68) has had an extremely active year in orthodontics in Mexico City. In March 1990 he was certified by the American Board of Orthodontics. Also, in March he entered the Chairman's Circle of the Orthodontic Alumni Association while attending and speaking at the Clinical Update in Acapulco. And in April he became Research Director of the Graduate Orthodontic Program of the Universidad Intercontinental de Mexico.

BARRY CUTLER ('68) in Vancouver, B.C. became a member of the Century Club this past year.

WILLIAM SPROULE ('68) sends his good wishes from his practice in Vancouver, B.C.

RICHARD M. EASTHAM ('68) in Bellingham became a Century Club member this past year.

A. WAYNE VAN TILBERG ('69) is retired in Ridgefield, WA. He received a Certificate of

Recognition for the volunteer work he has performed in Belize, Equador, and Honduras from ADA through its council on ADA Sessions and International Relations. Additionally he is a member of the Board of Directors of the Friendship Force, an international exchange organization.

DAVID RICE ('69), currently the President of the Alumni Association is busy with his two practices, one on Mercer Island and one

in Issaquah, WA. His wife, Mimi, stays busy with her travel business which sometimes allows a trip for Dave, as well. They have two grandchildren by their oldest daughter, Jenny. Matt is age 2 1/2 and Katie, age 6. Jenny's husband is a naval pilot. Their son, Jeff, is involved in business pursuits and daughter, Julie, 16 is a junior in high school. A few of the U of W '69ers met in Ashville, NC in September this year for their own "golf tour". In addition to his practices, and staying busy with the Alumni Association, Dave is involved with his study clubs, plays tennis, and operates a boat charter business in which most of the charterers have been orthodontists.

LYNN WHIMPEY ('69) sends wishes from his practice in Federal Way, WA.

FRED H. HASSIG ('69) sends greeting from Paradise Valley, AZ. This year he became a member of the Founders' Club.

KENNETH NORWICK ('69) is busy with his practice in Dearborn, MI. This year he joined the Founders' Club with his contributions.

ROBERT LITTLE ('70) stays busy teaching at the University of Washington and with his practice in Federal Way, WA. Additionally, he found time for lecture trips to: England, Australia, Connecticut, Ohio, Acapulco, Virginia, and Alaska.

NICHOLAS JOHNSON ('70) became a member of the Chairman's Circle this past year. His daughter, Nadine Johnson ('92) joined the program this year.

Ben Moffett (F) and family enjoy Sun Mountain, as a result of the gift certificate given him by the Alumni Association at the '89 Alton Moore Lectureship

LET'S CATCH UP

THOMAS PITTS ('70) reports from Reno, NV that he and wife, Ouida, have a 4-year-old son, Matthew, who is world class!!

John Smith ('77) with wife

**D W I G H T
DAMON ('70)** says hi from Spokane, WA.

**G R A H A M
MOORE ('70)** says hello from Rose Park, South Australia and says he will

see everyone in May in Seattle.

GEORGE MASUMOTO ('70) is busy with his practice in Honolulu, HI.

JAMES HANSEL ('70) reports from Poulsbo, WA that he was named Washington State 1990 Ducks Unlimited, "Carrier of the Year".

JEAN-PIERRE JOHO ('71) reports from Geneva, Switzerland that he is still the Chairman of the Ortho Department in Geneva, but he also just opened an extramural private practice. He is the Past President of the European Orthodontic Society. He plans to attend the AAO in Seattle in May.

ROBERT WENDT ('71) is busy with his practice in Everett, WA.

JOHN GRUBB ('71) FAXed his greetings from his practice in Chula Vista, CA.

GARY NORDQUIST ('72) says hi from his practice in Bellingham, WA.

ALLAN VAN NESS ('72) sends greetings from his practice in Bothell, WA.

Carlos Castro ('79) in his Costa Rica office with staff

ROBERT JULIUS ('72) wanted to say hello to everyone from Maumee, OH.

RICHARD GILE ('72) practices in Bellevue, WA and says he is working hard! His oldest son starts University of Washington Dental School in the fall of 1990.

ROSS KAPLAN ('73) says hello from Salem, OR.

FARRELL HINKLE ('73) has offices in Santa Ana and Newport Beach, CA. He is a Diplomate of the American Board of Orthodontics. Besides his practices he teaches graduate orthodontics at UCLA. This year he joined the Chairman's Circle.

WILLIAM GRAY ('73) has his practice in Port Angeles, WA. He is on the Board of Directors for the Port Angeles Rotary Club. For 1990-1991 he is President of the Olympic Dental Society.

JIM ELDER ('73) is on the Board of Directors of the Orthodontic Alumni Association. He practices in Puyallup, WA.

BARRY BEGET ('73) sends good wishes from Eugene, OR.

THOMAS VAN DYKE ('73) says hello from Ogden, UT.

ARTHUR STEIN ('74) sends a note from Lansdale, PA.

RICHARD SHAVER ('74) tells us he is retired in Vancouver, B.C.

ROD TUENGE ('74) sends greetings from Boulder, CO.

RON MARKEY ('74) practices in Vancouver, B.C. He was President of the Canadian Dental Association from 1987-1988.

RUSS DMYTRUK ('74) tells us he is active with his practice in Alberta, Canada but still finds time to coach hockey and play "old-time" hockey as well. His family is very active in tennis. His son, Paul, is ranked #2 in Alberta and went to the Canadian U18 Nationals in August. Erik, who is 11, did a tour of the Pacific Northwest this past summer. In six tournaments he won four events and was runner-up in the other two in the U12 category. His son, Mark, works as a tennis pro in the summer. Additionally, he finished his first year at the University last year with an 8.8 average out of 9 in the Faculty of Business.

MARK HEINEMANN ('74) stays busy with his practice in Silverdale, WA. He and his wife, Barbara, have a new addition - a son, Scott, who is almost 1 year old.

ALLEN MOFFITT ('74) sends greetings from his practice in Murray, KY.

LAWRENCE ROSENBERG ('75) is busy with his practice in Wayne, NJ.

JONATHAN KINNE ('75) says hello from his practice in Aurora, CO. This year he joined the Chairman's Circle.

WILLIAM B. GILE ('76) from Houston, TX joined the Century Club this year.

DIANE MILBERG ('76) sold her practice in Renton, WA and moved to Jamul, CA, a suburb of San Diego, CA. Her husband, Randy Rein, accepted a position there and is studying for the CA bar exam. She is enjoying getting settled and spending some

Ward Damon ('75) running Mercer Island 1/2 Marathon

time with her son, David, 6 and daughter, Laura, 3.

RAYMOND KUBISH ('76) of Mercer Island, WA recently assumed Jack Brandon's practice in Kent, WA after Jack's retirement. Additionally, he has been Clinical Instructor at the University of Washington since 1988.

RON GALLERANO ('76) reports from Houston, TX that Tracy is starting college this fall at Trinity University in San Antonio, TX. Ron started a term on the AAO Scientific Council. He asks if anyone knowing the whereabouts of the Orthodontic Cookbook will advise him of its whereabouts ASAP!!

JOHN SMITH ('77) presently has three practices around the city of Orlando, FL. He is still active with teaching orthodontists the principles and applications of the lingual orthodontic appliance and is currently working on new design and applications of the Herbst appliance. When he is not busy enjoying the challenges of orthodontics, he is busy fishing for the numerous species of fish that fill the waterways of

LET'S CATCH UP

FL, or scuba diving, golfing, or reading a good book.

HENRY FIELDS ('77) reports from Chapel Hill, NC that he has been appointed Assistant Dean for Academic Affairs at UNC School of Dentistry.

BRUCE HAWLEY ('77) is busy with practices in Lynnwood, WA and Ballard, WA. He is Treasurer of the Orthodontic Alumni Association Board of Directors. In the fall of this year, Bruce enjoyed a trip to England, seeing both London and other areas as well.

LOUIS METZNER ('77) practices in Vancouver, B.C., having moved to a new location this year.

DAVE WITZEL ('78) sends greetings from Aurora, CO.

PATRICK TURLEY ('78) joins the Century Club this year.

GREG GUYMAN ('78) is busy with his practice in Seattle, WA. He and his wife, Ka, enjoy boating, skiing, and travel, when they can. They have enjoyed going to Baja, CA and last year through the Panama Canal. Their two children swim competitively year round. He is active with the Blue Ridge Community Board of Directors where he is in the middle of a three year term. He is especially proud of having successfully completed the summit climb to Mt. Rainier on July 8th of this year.

Greg Guyman ('78) July 8, 1990 - 7:00 A.M.
Near summit of Mt Rainier

DON GARDNER ('79) is retired in Littleton, CO but has stayed busy with lectures this past year in six states and in Costa Rica, Central America for the Costa Rica Orthodontic Society. In June 1990 he spent 12 days with Carlos Castro ('79) in Costa Rica. His daughter, Debbie, is a senior at Duke where Molly Joondeph and David Cameron (children of other alumni) are also attending. His other daughter is a sophomore at the University of San Diego. In 1991 he plans to lecture in the Far East and in Europe. He joined the Chairman's Circle this past year.

CARLOS CASTRO ('79) has a beautiful office in San Jose, Costa Rica, Central America which he currently devotes full time to. His children are all involved in educational pursuits aiming toward the fields of medicine, orthodontics, and architecture. Don Gardner ('79) spent 12 days visiting him this past summer.

STANTON H. HALL ('79) joins the Century Club this past year.

JOHN IVE ('79) is busy with his practice in Bothell, WA. He and wife, Leanna, were blessed with their first child on 12-20-89, a son Tony who weighed in at 8 lbs. 14 ozs. The whole family traveled to Acapulco where Tony was the youngest guest!

BRYAN WILLIAMS ('79) besides being busy with his practice in Gross Pointe, MI, was recently appointed Director of the Maxillofacial program for Essex County. He and wife, Ellen, are also busy with their two children, Andrew, 11, and Meaghan, 9. This past year he became a member of the Century Club.

JANICE YIP ('79) continues to be busy with her

Royal College of Dentists. This he achieved in 1989. He was the first person to hold a Fellowship in more than one specialty. His other Fellowship was achieved in 1976 in Pediatric Dentistry. In addition to these pursuits, he and wife, Audrey, are active with their two children, Lindsay, age 7, and Jacqueline, age 2.

SAMUEL LAKE ('81) sends greetings from his practice in Bellevue, WA. In 1990 he moved to a new home and had a new son join the Lake family. Son, Jordon, was born in May, 1990. He joins Sam and wife, Lori's, other two children, Lauren, age 7, and Erin, age 4, to make a busy family.

GARY WOLF ('81) moved into his newly built office in Norwalk, OH in December 1989. He presented at the first annual Naples Dental Conference on orthodontics for the periodontally compromised patient in January 1990 and will return again in 1991. He also presented to the Case Western Reserve University Periodontal Study Club in May, and he was named Director of the Early Treatment Clinic in the CWRU Department of Orthodontics last fall where he continues as Assistant Clinical Professor on the faculty.

GLORIA LOPEZ/CAVITO DE OLALDE ('81) says hello from her practice in Mazatlan, Mexico.

LESLIE WILL ('82) writes from Oak Brook, IL that in April she and husband, Paul Kuo, gave two days of talks on orthognathic surgery to surgeons and orthodontists from the area at the National Defense Medical Center, Taipei, Taiwan ROC. The November issue this year of "Oral and Maxillofacial Surgery Clinics of North America" will have two chapters with Leslie's name on them. One on transverse correction was co-authored by Paul and Leslie. She soloed the other one on concerns of surgical mandibular advancement. This fall a trip is in the works to the People's Republic of China to teach about cleft management for Project HOPE. In addition to this, she stays busy with their two children, Lindsay, age 6, and Andrew, age 3.

BRIAR DIGGS ('82) sends greetings from his practice in Missoula, MT.

DANTE BRESOLIN ('82) is in charge of orthodontics at the Dental School at the University of Brasilia in Brasilia, Brazil. Also, he and wife, Rosa Maria, are busy with their two children, Diana, almost 5, and Helena, 2 1/2. In 1990 he joined the Century Club.

DENNIS NAPPEN ('82), with the US Navy Hospital in San Diego, CA, was ABO Certified in March 1990.

DAVE REMINGTON ('83) sends greetings from his practice in Sandy, UT. He joins the Century Club this past year.

CHARLES GILMORE ('83) says hello from Yakima, WA.

LET'S CATCH UP

HERMAN WILBRAND ('84) writes from his practice in Alliance, NE where he and wife, Cathy, also stay busy with their six children. This past year he joins the Century Club.

ALAN IRVIN ('84) sends greetings from Greensboro, NC.

LENA OMNEL ('84) is busy with her practice at Children's Hospital and Medical Center in Seattle, WA.

KEN AGRONIN ('84) married Michele Sabota on September 8th of this year in Rocky River, OH. They had a small, but elaborate reception afterwards for about 150 guests. Guests included: **Dave Crouch ('84)**, **Tim Shields ('83)**, **Alan Irvin ('84)**, and their wives. They spent their honeymoon in Europe where they traveled to Paris, London, Venice, Salzburg, and Munich. They are residing in Westlake, OH where Ken has successfully started his private practice. Michelle is employed by Airborne Express managing an export department. She has been with them for over 10 years, involved with customer service. In their spare time you can usually find them at the golf course or at the race track. Ken and Michelle hope to travel to a few more places before starting their family.

PHILIP BARER ('84) writes from Vancouver, B.C. that he became a Diplomate of the American Board of Orthodontics in March 1990. He is also a clinical

Ken Agronin ('84) with his new bride, Michelle on their wedding day

instructor at the University of British Columbia.

SCOTT NASH ('84) says hello from his practice in Mt. Vernon, WA.

RICHARD RIEDEL (F) says hello from his home in Poulsbo, WA where he is enjoying retirement.

BENJAMIN MOFFETT (F) is continuing to devote 60% of his time in semi-retirement authoring a textbook and spending the balance of his time at the University of Washington. He sent great photos of the time spent at Sun Mountain Lodge that he was able to enjoy, as a result of the gift certificate received last year at the Alton Moore Lectureship. He says "thank you" to all for the enjoyable time.

LEENA KOSKINEN-MOFFETT (F) continues teaching at the University of Washington. Leena enjoyed the time at Sun Mountain as well.

JON ARTUN (F) says hello from the University of Washington.

GEORGE MCCULLOUGH (F) says hello from his home in Yakima, WA where he is enjoying retirement.

ROY GUNSOLUS (F) is currently a Director of the PCSO and continues to teach at the University of Washington.

Look for information on classes 1985 - 1990 in a separate article

NEW FACULTY

SUE HERRING was born in Pittsburgh in 1947 and grew up in Pittsburgh, and Philadelphia PA and Santa Ana, CA, (in that order). She left California to attend the University of Chicago in 1964 receiving a B.S. in Zoology in 1967 and a PhD in Anatomy in 1971. Her thesis was on functional morphology of the heads of wild pigs and their relatives. During 1971-72 she was a postdoctoral fellow at the University of Illinois Medical Center (now known as University of Illinois at Chicago), doing electromyography on pig jaw muscles. In 1972 she was hired at UIC as Assistant Professor of Oral Anatomy in the dental school and rose through the ranks to Professor of Oral Anatomy (Dentistry) and Anatomy (Medicine) in 1986. Research interests include almost every aspect of the vertebrate head, but especially the ways in which cranial function influences form.

She joined the faculty in May 1990 and is still cleaning out the lab. She very much likes the scenery and the coffee, but she is not so keen on the slugs! Her major hobby is playing the violin, especially chamber music.

DOUGLAS S. RAMSAY received his B.A. in psychology from Franklin and Marshall College in 1979 and his DMD from the University of Pennsylvania in 1983. After completing dental school at the University of Washington School of Dentistry as a post-doctoral fellow conducting behavioral dental research, in 1985 he received a position on the University of Washington Dentist-Scientist Training Program which supported his advanced training in psychology (PhD 1988) and orthodontics (M.S.D. 1990). Doug is extremely pleased to be jointly appointed, beginning July 1st 1990, in the Departments of Orthodontics and Pediatric Dentistry. In addition to his research and teaching responsibilities, he is conducting a one day a week orthodontic practice within the School of Dentistry.

In addition to his teaching responsibilities and practice, he has been working to beat an October 1st deadline to submit material for a grant proposal and getting ready to attend a conference in St. Louis at end of October.

On the personal side, he was proud to tell me he had lost 23 lbs since graduation. He also has found time to buy a house, in the Montlake area. He says there are a lot of projects to be done in the house and he will welcome any and all tips as to how to best go at doing some of them. (He probably would accept any offers of handiwork as well!) He enjoys tennis and table tennis and really looks forward to becoming better acquainted with his fellow alums over the next several years.

CLUB STATUS BY CLASS

We appreciate those of you who have contributed and reached Club status with your gifts.

Noted below are those who currently have reached Club levels as referenced.

*Noted with an ** are individuals who have attained their current club status within the past year.*

ALUMNI ASSOCIATION SUPPORT

FACULTY RESEARCH FUNDING REQUEST

In June of this past year, **Bob Little** ('70 - F) submitted a request to the Board of Directors of the **Alumni Association**. Quoted below is a brief paragraph from that request:

"For the past several years Dick Riedel and I have pursued, without success, federal and UW sources of funding for our postretention research. I know that you are quite familiar with the material as well as the many studies that have been published. As you know, this type of research has been a productive graduate student and faculty resource for several decades.

Ideally, we would like to develop a registry of records for data entry, easy retrieval, and study. In order to best deal with this material we will need space, staff support, plus computer hardware and software." He then went ahead to specifically focus on the individual parts of this request in detail.

Thanks to you, the Alumni who continue to support the Association with your contributions, the Board of Directors of the **Alumni Association** was able to honor this request, and we are able to print the following "thank you" letter from Bob Little.

ALUMNI SUPPORT OF FACULTY REQUEST

"As you know, for a number of years Dick Reidel, and other faculty members, as well as myself, have published research on the growing collection of postretention cases recalled from school files and from the practices of faculty. To facilitate this unique research the Alumni have recently made several hardware and software purchases totalling several thousands of dollars. Soon to be housed in Bob Little's office will be a Macintosh II cx computer with a two page video screen. Cephalometric films can be digitized with the Alumni purchased Quick Cept II software and digitizer.

The goal will be to develop a database of all postretention cases with chart data plus model and cephalometric measurements entered for easy retrieval and analysis. Alumni support of this effort will permit faculty and graduate students to continue and upgrade research on this wealth of material. Thank you for your support."

Bob Little, DDS,MSD,PhD

You, the alumni, make this story possible. As Bob's request points out, faculty had tried for many years to get funding, with no success. Only because you have continued to make contributions to the **Alumni Association** was this request able to be made possible.

As other sources of funding become more difficult to obtain, your support is needed even more. Please review your own situation and determine the method that will work best for you to make ongoing contributions to the **Alumni Association**. Your support is very much appreciated and needed.

ALUMNI ASSOCIATION SUPPORT

TAILOR MADE CHARITABLE GIVING

In these days of further diminishing governmental support for the educational and research needs of academic systems in general, and more specifically our Department, we, the Board of Directors of the **Alumni Association** keep trying to find resourceful, creative, but still, financially sound ways to raise money to aid and assist our students with research projects, other programs, and areas of enriched education for which no other funds are available.

The costs of funding needed projects continues to rise for the students and the Department. Our goals, as we stated to you in an earlier mailing are to:

- ☐ Maintain the excellence of the Orthodontic Department through Alumni funding and activities
- ☐ Facilitate Alumni networking and interaction
- ☐ Provide a continuing education forum for our Alumni
- ☐ Encourage new graduate participation in the **Alumni Association**
- ☐ Increase the size of the Endowment Fund to increase our support for the activities of the Department
- ☐ Establish a dues structure which will allow us to fully fund the administrative costs of the **Alumni Association**
- ☐ Enhance our international prestige in the orthodontic community.

As we have also identified to you in earlier mailings and other articles in this Newsletter, we need a continuing flow of cash donations to maintain the students' and Departmental needs and to meet our overall goals. We encourage you to plan a commitment to a new 5-year pledge and look forward to a generous show of support from you for the Paul D. Lewis 95th birthday celebration, which you will receive more information on soon.

However, we realize no one form for making contributions is going to work the best for each and every Alumni. We have begun to realize this fact more and more in the past few years as alumni have raised questions as to how they can make a gift to the **University of Washington Orthodontic Alumni Association** that benefits both the **Association** but also fits their own situation best.

CONTRIBUTION IN LIEU OF PAYMENT

One program which continues to offer significant interest for a lot of you is the "Contribution in lieu of Payment" program. With this, several of you have successfully been handling the problem of how to effect payment for professional services when you treat health care professionals or members of their families. Many of you have found this to be an excellent way to increase your own contributions to the **Alumni Association**, as well. An example of this is **Jonathan H. Kinne** ('75) who in 1990 joined the Chairman's Circle primarily as a result of utilization of this method. We really appreciate each of you who continue to support the **Association**.

We are printing a copy of a sample letter which you can use or to modify your own treatment letter. If any of you would like a full size camera ready original, which can be used to copy onto your own letterhead, please contact Carolin Benjamin.

**WE APPRECIATE YOUR
CONTINUING SUPPORT!!!**

ALUMNI ASSOCIATION SUPPORT

CHARITABLE ESTATE AND FINANCIAL PLANNING PROGRAMS

EXAMPLE OF CONTRIBUTION IN LIEU OF PAYMENT LETTER

Dear Colleague:

As we have discussed, this letter is to confirm my suggestion that you make a tax deductible contribution to the University of Washington Orthodontic Alumni Association in my behalf for professional services rendered by our office. Funds received by the Alumni Association are used to support ongoing research in the Department of Orthodontics at the University of Washington, and such research is vital to maintaining the highest level of orthodontic expertise and knowledge. Return the bottom portion with your check to the address below. Thank you for your support.

Sincerely,

Alumnus

Carolyn Benjamin
4016 92nd Avenue S.E.
Mercer Island, WA 98040
Phone 206-232-5186
FAX 206-236-1538

Enclosed is a contribution to the Alumni Association in the amount of \$_____. Please notify Dr. _____, member of the Orthodontic Alumni Association, that this contribution has been made in his name. (My check is made out in US funds to "University of Washington Orthodontic Alumni Association.")

My name and address are printed below for sending an acknowledgement to me.

Contributor

Address

In our continuing effort to address these funding needs, we have reviewed some of the ideas and programs other schools and charitable groups have successfully established. We have sought input from professionals who have worked with some of these other groups and programs and have been assisted by **Feek & McCormick**, a nationally recognized and respected consulting and financial services company, who has particular expertise in applying charitable techniques to meet family and individual estate planning, financial planning, and specialized insurance objectives.

Concepts that previously (*and exclusively*) were utilized by only the very wealthy, are now available to you. These concepts will have the effect of assisting you personally with your own financial needs and at the same time benefit the **University of Washington Orthodontic Alumni Association**. As a recognized tax-qualified charitable organization, the **Alumni Association** can benefit while you, at the same time can:

- ☐ Increase lifetime income
- ☐ Create substantial current income tax deductions
- ☐ Eliminate estate tax exposure
- ☐ Sell appreciated assets (property, your practice, etc.) free of capital gains tax
- ☐ Preserve wealth for your heirs
- ☐ Establish a pension supplement on a tax and creditor free basis, and,
- ☐ Substantially endow the **Alumni Association** rather than Uncle Sam.

So if you are personally at a stage where your objectives include; tax reduction (income, estate, inheritance, and/or capital gains), retirement enhancement, divestiture of your practice (or a highly appreciated asset), increasing net spendable income, and/or benefiting the **Alumni Association**, we recommend that you inquire for more information, and then judge for yourself if some of these programs can make sense for you.

For more information on these programs and how to contact the principals of this professional service organization, contact Carolyn Benjamin.

LET'S CATCH UP

THE LAST FIVE YEARS -- 1985-1990

While funding to purchase needed equipment and supplies for the Department and to assist with research projects of students are the "real" and tangible things we address as we ask for your support, there is the whole area of what these "real" and tangible things do for the students and the Department that is more intangible, but very important. The *quality* of education and the ultimate effect this has on the student's life and lifestyle as they continue into the professional world after graduation are at stake as we continue to ask for funding.

Five years ago you, the alumni, were asked to make a pledge of support to the **Alumni Association**, which should be paid in full by the end of this year. We will again be asking you for a new five-year pledge. We have looked at putting together meaningful programs assisting you in contributing funds to the **Alumni Association**. We need your continuing show of support.

Since 1985 there have been 38 students graduating the program, with another six this year. In building this newsletter, we made connection with most of these students who have graduated since 1985 to find out what has been happening in their lives since graduation. This project began as an informational forum for "catching up" with them. But as they talked with us and spoke about their lives, it became clearer and clearer was how very much these 38 people's lives had been enhanced by their education at the

University of Washington School of Orthodontics. These students have gone on since graduation into all parts of the country and world to continue in their chosen profession. These are all dedicated people to the profession. They are active in their communities. They are active in the profession in a number of ways; writing, lecturing, through study clubs, etc. They are building productive, quality lives.

In preparing this article, while we have focused on the students for the last five years, the issue remains the same whether we are talking about students who graduated last year, five years ago, or fifteen or twenty. One fact of why **University of Washington Department of Orthodontics** graduates are able to go into the world and make a difference can be traced back to their *quality* education. Those of you out of school several years will also be able to identify that your life and standard of living can be traced back to the educational opportunities you had with the Orthodontic program. This is what we continue to ask you to support, so opportunities for today's students and tomorrow's students continue to be available. Without your support, opportunities may not be available for them. We continue to ask for and need your help.

Let's "catch up" with the graduates of the past five years and find out what is happening with them.

CLASS OF 1985

SARA DEVINE is an orthodontist with the United States Air Force. Her husband is also with the Air Force. The last time I communicated directly with Sara was in July 1989 when she was preparing to move to a new assignment in Turkey. Her classmate Stephanie Kavanaugh told me she saw Sara in Washington D.C. at the annual AAO meeting in May 1990. She reports Sara to be fine and that she has a daughter who is about 2 years old. With the situation going on in the Middle East, we trust Sara and her family are fine and not experiencing any hardship.

STEPHANIE KAVANAUGH went into private practice in Issaquah, WA immediately after graduation. She lives in Seattle with a dog, cat, and three turtles. She loves traveling to Costa Rica. In addition to a very busy practice, Stephanie keeps busy as a tutor in an adult literacy program with Seattle Central Community College. She also likes to spend her free time hiking and doing cross-country skiing. Another love is traditional, international, and vintage dancing.

MARK KITAMURA went into private practice in Pearl City, Hawaii immediately after graduation. He tries to get to the States at least once a year to ski, enjoying such places as Tahoe, Utah, and Canada. Currently he is involved with two study clubs in his area. He and his wife, Margaret, have three boys whose ages are 13, 7, and 5. Mark gets very involved with the boys in lots of sports activities, especially baseball. He hopes to see everyone in Seattle in May at the AAO.

GARY MAY has been in private practice in Medford, OR since the fall of 1985. His wife, Beth, works in the office. They have two children, a daughter who is 3 years old and a son who is 6 1/2 months old. Gary and Beth are building a home. Gary is applying his handiwork to do the electrical work and build the cabinets and other woodwork. When he has any "free" time, he enjoys fishing.

TRENT RENCHER is involved with two private practices. He purchased Dr. Riedel's (F) practice on Bainbridge Island, WA where he practices with an associate. Additionally, he practices solo in Poulsbo. He and his wife, Dianne, have three

children, Allison age 7, Ashley age 5, and Benjamin age 3. Dianne stays involved with the office bookkeeping in addition to a full schedule with their active children. Trent is very involved with his church and youth groups. He sponsors soccer tournaments and has had his own softball team, "Dr. Rencher's Smile Team".

STEWART ROHRER is in private practice in the Vancouver, B.C. area. He took off the first summer after graduation, but then bought his practice where he has been for the last five years. His wife, Joanne, works with him in practice management. When they can, they enjoy traveling to the States to the areas of Oregon and California. Locally, they go to Port Alberni as often as possible. In the summer, water skiing is a sport Stewart enjoys. From January through May he teaches one day per week at the University of B.C.

LET'S CATCH UP

CLASS OF 1987

RANDALL ADAMS is practicing in Mesa, AZ with another orthodontist. He and his wife, Shelly, have three children, Christi, 9, Scott, 6, and Tyler, 1. He loves sports, especially basketball. He also likes to read. Additionally, he is a Boy Scout volunteer. He and Shelly love taking the kids on family outings. Professionally he is involved with the Arizona State Orthodontic Association.

DONALD MONTANO says to tell everyone he is as crazy as ever! He bought a practice with two offices in January 1990 in the Bakersfield, CA area and currently has a full-time associate. The big excitement in Donald's life is that he is going to be married on November 30th of this year to Melinda Grimes. His bride-to-be is a computer programmer/analyst. Besides building his practices and planning for a honeymoon in Maui, he tries to ride his mountain bike every weekend and takes tennis lessons. He looks forward to seeing everyone in Seattle in May.

ENRIQUE NESTEL practices in Mexico City, Mexico. He participated in the Clinical Update in Acapulco in March. The big event for this year for

he and his wife, Astrid, was the birth of their baby girl, Elian Aliza, who was born in the summer. He tells me she is the very first niece or nephew and grandchild for both families and is very spoiled! Also, he says she is the only girl in the entire Nestel family.

MICHAEL SEBASTIAN has been in practice for about three years with Walt Sheffield in Atlanta, GA. His wife, Patricia, is a money market trader. They love to travel in their free time and have been able to travel to the Virgin Islands, Paris and the Riviera, and to Colorado for skiing. Additionally, Michael loves golf and tennis. He and Patricia have bought a home, and he is very much enjoying private practice.

BARBARA SELLER practices with the Children's Dental Clinic in Seattle, WA. She is involved with practicing both pediatric dentistry as well as orthodontics. In the past three years, she and

husband, Jeff Short, have built their home in the Wallingford area of Seattle, WA. Their first child, a baby girl, Christine, was born last October. Barbara says that in her free time she loves gardening. She is extremely busy. I reached her as she was racing out the door to go to an Orthodontic study club meeting. She says she loves working with the residents in the University Hospital, and she gets involved with a number of lectures.

DAVID WEED is in private practice on Mercer Island, WA. The main focus of his wife, Kim, and his life is their 19-month-old son, David. They are awaiting the birth of a second child in December, which they are really looking forward to. Kim is an attorney working with the King County Bar Association. In addition to his Mercer Island, WA practice, he works in his Friday Harbor practice in the San Juan Islands two days a month. Also, he currently works in the practice of Gene Campbell ('59) in Burien, WA due to an illness of Dr. Campbell. If all this does not take enough time, he is also on the Board of the Mercer Island Boys and Girls Club, is active in Rotary, and teaches 1/2 day per week at the University of Washington, lecturing in a Techniques Course.

CLASS OF 1988

ROBERT CASKEY went into private practice immediately after graduation by buying a business in the Olympia, WA area. He and wife, Tina, have three children, a daughter, age 7 and two boys, ages 5 and 1. He jogs early in the morning and plays racquetball about once a week. The whole family enjoys biking. With a busy practice and keeping busy with family activities, there has not been a lot of time for travel. However, family lives in AZ where they hope to visit in November, however. Robert is also very active in the Thurston County Dental Society.

TIM DENISON will complete his second full year in private practice on November 1st in Old Saybrook, CT. He has been involved with beginning a study club in the local RI and S.E. CT area. His wife, Christina, works as a para-legal for a law firm in the Hartford area. In addition to his busy schedule with the practice and other professional activities, he manages to teach one day a week at the University

of Connecticut. When I asked Tim what he did for fun or for sports, he said, "I have low budget hobbies. I jog or sail on other people's boats!" He also said he wanted to have a boat of his own in about 15 years! He hopes to see everyone in Seattle in May.

DEVEK FRECH bought a practice immediately after graduation in the Wichita Falls, TX area. He is already preparing plans and putting together financing for a second office, which he targets to open in three years. He has put together a local study club in the Dallas area and is working to establish a national study club for young orthodontists. The AAO in Seattle is planned to be the kick-off for this group. (See more details on this on the page titled - Future Events.) He and wife, Terry, traveled

to Acapulco in March for the Clinical Update. Besides keeping up with daughter, Lauren Michel, age 1 1/2, Terry is busy as Office Administrator. She is also taking computer classes and getting ready to do a newsletter. About a year and a half ago they bought a home that they are involved with remodeling. Devek plays a lot of golf, and he plays racquetball, when he has time. He looks to see everyone in Seattle in May.

JERROLD HENNES started his private practice in August 1988 in Vista, CA (near Oceanside). He got out of school and three weeks later leased space from a general dentist. Six months ago he moved into his own space and feels he is getting pretty established, having recently computerized the office. In November 1989 he married his wife, Jill, who is an artist/painter/printmaker and went to school at Cornish in Seattle. For their honeymoon they went to the island of Maui and had a wonderful time.

LET'S CATCH UP

GINA TRASK began her private practice in Seattle, WA in 1986. She is extremely active in the Orthodontic professional community, having last year held the position of Secretary of the Seattle/King County Dental Society. This year she is on the Executive Council of the same organization. She was a delegate to the Washington State Dental Association and was the Past Chairman of Children's Dental Health Month. She is on the Strategic Planning Committee of the Washington State Dental Association and Chairperson of the Legislative Committee of Washington State Society of

Orthodontics. If all of that does not keep her busy enough...last year she bought a house, which keeps her even busier. She enjoys cooking and entertaining. She is learning to ski and to wind-surf. In the past few years, she has been able to enjoy visits to London, Paris and Germany. She regularly lifts weights and runs, although she says not marathons. And on rainy days in Seattle, she uses a Stairmaster.

DENNIS WINN II opened a private practice this past summer in Akron, OH. Since his graduation he had been with the Sears Dental Center. He and his

wife, Ann, have three children, Mary age 8, Jessica, age 4, and Stephen age 1. They are very involved with the children's activities of gymnastics, piano lessons, and girl scouts. In the winter Dennis skis, mostly in CO. His 8 year old is beginning to be interested in the sport, as well. This past year he traveled to Colorado Springs, CO to the Great Lakes Association of Orthodontics. And while he had really hoped to participate in the Clinical Update in Acapulco this past March, the date conflicted with a pre-arranged family ski outing for Dennis, his dad, and brothers. He is also an avid photographer.

CLASS OF 1986

KIRK ALLRED began his own practice in Ogden, UT immediately after graduation. He says after the first tough years, he is finally seeing his way through the student loans. He is active in the local study club with Dave Remington ('83). In addition, he is Chairman of the Dental Health Committee and involved with the Rocky Mountain Ortho Society. He plays on a basketball team, which won the championship for three straight years! Kirk also likes to ski, fish, camp, and is active in boy scouts. And if all of this does not keep him busy, he and his wife, Leslie, have five children. There are three girls and two boys. They are ages 10, 7, 4 and twins (one boy and one girl) born last April. He says he thought going to Acapulco to the Clinical update really sounded like a great time, but thought his wife might never let him back into the country if he left her here eight months pregnant with the three other children, and therefore did not attend! (While you were missed - probably wise thinking, Kirk!)

ED POREMBA bought his practice in Colorado Springs, CO in 1986 from Dr. Glenn Zimmer ('60). He and his wife, Sue stay very busy with their three children, Katie who is 4, Libbie who is 2, and Beckie who was born in March of this year. They bought an older home two years ago that they have put a lot of energy into remodeling. Ed says that as the family continues to grow, they have almost outgrown the house already! Both of their parents live in Denver, as well as other family members with children the same age as Ed and Sue's, who they spend a lot of time with. Ed and his family are involved with swimming and skiing, depending on the season. He says he pretty much gave up golf because it takes a lot of time and he felt guilty being

gone and not helping Sue with the kids. (Sue—it sounds like you have him trained right!). Ed is on the board of the Colorado Springs Dental Society as well as being on the AAO Council of Library Resources for the past two years. About one year after graduation, the Porembas and the Smalleys visited their classmate John Walsh in Ireland.

CYNTHIA ROSENBERG practices with the Rhode Island Hospital in Providence, RI where she is busy with the Cranial Facial Clinic and has a large practice of cleft palate patients. In addition to her busy practice, she is working with a study on sleep disorders as part of a grant. She is involved with the Department of Surgery at Brown University as an Assistant Clinical Professor. Her husband has finished his doctorate in education at Harvard and will be looking for a teaching position. They go to New York as often as possible to visit family, and Cynthia says she really looks forward to seeing everyone in May in Seattle.

WARD SMALLEY has been in private practice since graduation in Seattle, WA. Additionally, he teaches part-time in Graduate Restorative and Graduate Ortho at the University of Washington. He and his wife, Liz, have a 2-year-old daughter, Morgan. Ward is actively involved in a local study club. He was involved in speaking at the Clinical Update in Acapulco in March, in addition to other speaking events. In his free time he enjoys all sports, specifically, water skiing, snow skiing, boating, and golfing. This past summer he and Liz enjoyed renting a house boat on Lake Roosevelt.

JOHN WALSH returned to Dublin, Ireland immediately after graduation where he built a new office. He divides his time 50/50 between pediatrics and orthodontics. He says there is only one other pediatrician in all of Ireland, and there is also a shortage of orthodontists. As a result, he stays quite busy! His wife, Ann Marie, works in the office full time. John and Ann have a son after 16 years, a little boy named John Patrick. About a year ago John took up golf. He says he took a course when he was in Seattle, and he still has not improved much, so his classmates should not worry if he gets to come to Seattle in May! When he was in Seattle, he also learned to ski. Now when he gets a chance, he skis in Switzerland. He also mentioned how much he enjoyed the Porembas and Smalleys visiting him in Ireland after graduation.

JOHN WILKINSON is in San Jose, CA. He has been in private practice for part of the past year. He and his wife, Donna, have two daughters, Ashley, 3 1/2 and Linsey, 2. He is involved with the local study club. He spends his free time with his family and also rides his new mountain bike.

LET'S CATCH UP

About a year ago they bought a new house, which they are enjoying. In his spare time Jerry enjoys riding his bike. In October of this year, he went to St. Louis to take Part II of the A.B.O. and is anxiously awaiting the results.

JEFFREY SCHUR is in private practice in Bellevue, WA. He and wife, Shelly, are enjoying being new parents with their first child, Blair Daniel, who is 5 months old. Jeff and Shelly bought a home in

Kirkland, WA. In the summer they took a trip with the baby to Yellowstone. Jeff stays busy with the Young Dentist's Committee for Seattle/King County as well as being part of the re-election steering committee for Dan McDonald, state Senator for WA. He is also committed to working with kids, managing and coaching a Little League team. This last year his team went for 17 - 0.

STEVEN SPURRIER is in practice in Salt Lake City, UT. He and wife, Lori, stay busy with their two children, Ashli, 2 3/4 and Christopher, 10 months. He has been recently elected to the Board of Directors and Board of Delegates to the Salt Lake district of the Utah Dental Association.

CLASS OF 1989

DIANNE CHUN and husband, David Cherk, are living in Fremont, CA. She currently divides her time between two practices in Redwood City and Oakland. In the time since graduation she has been looking around the area to determine where she wanted to establish her own practice and has decided on the East Bay area of San Francisco where she targets early 1991 to open. She and David bought a home and are enjoying getting involved with community activities. In her free time she has enjoyed taking classes in pottery and investing as well as biking, hiking, and generally enjoying things to do in and around San Francisco. Earlier this year they traveled to FL where they were able to visit with Greg Huang.

CHRISTEL GORRIS has been practicing in the Netherlands since graduation. We have heard she continues to do well, although she was also unable to be reached at press time.

GREG HUANG resides in Plant City, FL. He is in the final stages of getting his new office ready to open. This opening will happen about the end of October. After graduation, he remained in Seattle for about six months and then moved back to Florida. There he has divided his time between two practices in the Tampa prior to putting his own together. He is also currently on the faculty of the University of Florida.

DAVID McREYNOLDS set up his own practice in Keller, TX (a suburb of Ft. Worth). Additionally, he is involved with two other practices, one being about 60 miles away, so a lot of his time is spent commuting. He and wife, Leslie, had their baby, Carson, in September 1989. He and Leslie have tried to take advantage of trips on a few occasion but so far, after three tries, still have not gotten out of town! The last time being when Carson had the chicken pox at three months old. David is very

involved with the community and has been in charge of a local group that is building a new playground for the city of Keller. This project has been very active for several months. He also was a charter member of the Rotary group in Keller. He says two other young U of W grads are close by, with Devek Frech('88) being 60 miles away and Chuck Alexander('90) being about 20 miles. He hopes to make it to Seattle in May.

BRIAN POVOLNY continues to live in Seattle and is with the Department of Oral Biology expecting to get his PhD in the autumn of 1990.

NANCY UNG divides her time about 50/50 between San Leandro and Berkeley, CA with two practices. In her spare time she enjoys hiking, biking, and swimming. Since she enjoys travel, she plans to try and visit New Zealand next year.

CLASS OF 1990

CHARLES ALEXANDER returned to the Arlington, TX area after graduation to practice. He and wife, Keri, had their first baby on July 27th, a son, named, Richard Mac, weighing in at 16 lbs 15 ozs and being 19 inches long.

THIEN BUI started his practice from scratch after graduation in San Jose, CA. He opened in mid August, and says he is putting in 16 hour days, working harder than when he was in school! (He said Peter would not be so happy hearing this!) He says "hi" to all and hopes to make it to Seattle in May.

DIANE DOPPEL is in practice with Ken Kahn ('50) in the Seattle area. She resides in Kirkland, WA.

THOMAS POPP began work to start his practice in Chattanooga, TN in the fall of this year. He has bought the building and targets mid-November, early December to have the practice up and running. He and wife, Starr, had their first child, Colton in March of this year. Starr is working with him to get the practice up and running and keeping up with Colton who is now 6 months old and weighs 23 lbs.

DOUG RAMSAY has joined the faculty of University of Washington. (See details in separate article on new faculty.)

JAY ZUROFF has moved to Kennewick, WA where he is leasing a space and targeting November 15th as the date for the opening of his new practice. Additionally, he is involved with the local dental society. His wife, Anja, plans to be involved with the practice in office administration. They enjoy time with their daughter, Lara. And when Jay has time, he enjoys snow and water skiing, also fishing, duck, and game hunting.

PAUL D. LEWIS

A 95TH BIRTHDAY CELEBRATION FOR PAUL D. LEWIS!!

How different everything must have been 95 years ago! In 1896 a gallon of milk was only a quarter and bread was only a nickle. Tootsie Rolls were first created that year. The average family income was \$430.00 annually! We can't even compare the price of a Ford automobile today with those in 1896, because the first one was not built until 1903! The first modern Olympics were established in Athens with James Connolly being the 1st Olympic champ. The first Fannie Farmer cookbook, was published and the first S & H Green Stamps were distributed. This was the year of the first Rural Free Delivery (R.F.D.) being established. Utah became the 45th state. At the theatre people were watching "A Parlor Match" by Hoyt, "La Boheme" by Puccini, and "The Seagull" by Chekhov. The first motion picture played at the Music Hall in New York City. They were listening to "Wedding Day at Trollhauugen" by E. Grieg, "A Hot Time in The Old Town", "Love Makes The World Go Round", "The Red River Valley", "Sweet Rosie O'Grady", "When The Saints Go Marching In", "Mother Was A Lady", "Rustle Of Spring", and "In The Baggage Coach Ahead". The minstrel show was fading and the new entertainment of the day was variety or vaudeville. The cakewalk dance was popular. Barnum & Bailey Circus first played in Madison Square Garden. The book of the day was "In His Steps" by C. Sheldon. Raves were being heard for a new work by Toulouse-Lautrec, "Elles". Grover Cleveland was President of the Country - a country that had only 70,885,000 people. How we have grown in 95 years! Now we have 250,410,000 people.

The **Orthodontic Department of the University of Washington** did not exist in 1896. The concept of an orthodontic speciality was in its infancy. Today the Department does exist, thanks to one of the people born in 1896 — **PAUL D. LEWIS**. Paul is a special, one of a kind type person, and the Alumni plan to make Paul's 95th birthday special. A special, one of a kind birthday celebration for a special, one of a kind type guy!

We ask your support in making this special day happen. As we approach the beginning of a new five year period of fundraising, we will be asking you, the Alumni, for a new pledge amount for the next five year period of time. What we ask is that you make this pledge, thinking about how much better your life is today because of the education you received through the **School of Orthodontics at the University of Washington**. The amount of the new five year pledge you contribute the first year will be made in the name of **Paul Lewis**. We will be mailing more detailed information to you shortly on this special event.

At the **Alton Moore Lectureship** on June 14, 1991 we plan to present Paul with a huge birthday card with everyone's name who has given in his honor. Those of you who make your 1991 contribution by March 30, 1991 will have the opportunity to include your greetings on this gigantic birthday card. You can help to honor this special person, who helped to create the opportunity for you to be, professionally, where you are today, because of his devotion to caring and working to establish the **School of Orthodontics at the University of Washington**.

Look for more details soon, on how you can participate in making this a special, one of a kind birthday celebration for a special, one of a kind type of guy - **PAUL D. LEWIS**.

PAUL LEWIS - INSPIRATION TO ALL

After the Alton Moore Lectureship this year, I was telling Paul Lewis what an inspiration he is to all the younger orthodontists and that so many people had expressed to me how pleased they were to see him at the Lectureship. During the conversation, I asked him to write a brief article for this year's Newsletter. Below is Paul's article:

"To avoid unsuccessful or less successful treatment and effort on our part, in the orthodontic correction of some of our patients, we should search for the help and co-operation that some of our patients seem to lack at times.

At the start or beginning of treatment, parents should be carefully informed of the necessity of the child's help and co-operation during the periods of treatment and retention. With encouragement from the parents, a lack of co-operation can usually be avoided and treatment may be shortened.

Ask for encouragement from parents as well as patients. Get acquainted with parents. At times this helps a lot."

PAUL D. LEWIS

HISTORY OF THE ORTHODONTIC DEPARTMENT UNIVERSITY OF WASHINGTON SEATTLE, WASHINGTON

This article is an original memo written by Dr. Paul D. Lewis several years ago. We are presenting it in its entirety in this year's Newsletter to remind us all what a critical part Dr. Lewis played in the development of the Orthodontic Department.

"The School of Dentistry at the **University of Washington** had its beginning in Seattle, Washington in 1946. That year, buildings to house the Dental and Medical Schools, as well as the Schools of Pharmacy and Nursing were in the process of construction - so classes and equipment were pretty well scattered around the University campus.

In 1949, the grand opening was had and the above named schools moved into their respective quarters. Dr. Earnest Jones, who had been teaching at the Dental School of **U.S.C. in Los Angeles**, was the first Dean of the School of Dentistry at the **University of Washington**.

Dr. Emery Fraser, an orthodontist practicing in Seattle, met with Dr. Jones to discuss with him the possibilities of organizing a department in the new school to teach orthodontics. Later, Drs. Fraser, E. Allen Bishop, Paul Lewis of Seattle, together with Drs. Milton Fisher and William McGovern of Tacoma met several times with Dean Jones to further discuss this project. These five men, several years earlier, had formed an orthodontic study club, and it was their hope now to be active in this new department in the school.

A search was started to find a well qualified man to head this department. Dr. Alton Moore, who had graduated from the Orthodontic Department at the **University of Illinois in Chicago**, was invited to come to Seattle for an interview. Dr. Moore, at that time, was practicing in Chicago. He had originally graduated from the **University of California** in Dentistry and it was hoped he might be interested in returning to the West Coast. Dr. Moore accepted the invitation to come here for an interview, and made a fine impression on all of us. We liked his attitude and his personality. He was the man for the job as far as we were concerned. He did not appear too eager at first to take on the added work and responsibilities of this change as he was enjoying his practice in Chicago. This worried us at first; later, however, he admitted he was looking forward to this move to Seattle.

Why would Dr. Moore be willing to leave Chicago and come west to Seattle and go through the worries and solve all the problems of developing a department of orthodontics in a new school? It was a big decision for him to make and no doubt a challenge at the same time. Perhaps one of the most encouraging aspects about making this move to Seattle was the fact that Dr. Moore felt he had a ready made faculty in the members of our Study Club he met here. These study Club members had been meeting and working together for several years. Also, they had been working quite closely with Dr. Charles Tweed of Tucson, Arizona. Dr. Tweed, at that time, was becoming well known nationally because of his advanced philosophy of orthodontic treatment. This Study Club, in fact, was known as the **Northwest Tweed Study Club** and the members mentioned above hoped to become a teaching faculty in the new department of orthodontics.

Paul Lewis (R) at 1990 Alton Moore Lectureship with George McCulloch, "Wick" Alexander, and Al Moore (L to R)

PAUL D. LEWIS

In 1948, Dr. Moore accepted the position as Department head and with his lovely wife, Myrna, and daughter Cathy, moved West from Chicago to Seattle. This was the start of the **Graduate School of Orthodontics at the University of Washington**. Space was allocated in the new Dental School for the Orthodontic Department and chairs, cabinets and other necessary equipment were provided and installed ready for a first class.

But wait, who are we going to teach? Where would we get students for the first class? In 1948 we had a meeting in Yakima, Washington, in Dr. McCulloch's office and attempted to sell two young men who seemed to be interested in becoming members of our first class. Dr. Moore did most of the talking, outlining all of the advantages of the course that would be given. We landed one man. Another prospect got away!

We did have some lucky breaks, however, in April of 1949, Mrs. Estelle Clark joined the Department as Dr. Moore's secretary. What a wonderful influence this woman has had on the Department over the years. And secondly, Dr. Moore influenced Dr. Richard Riedel, who was a recent Northwestern graduate in Orthodontics, to also cast his lot with us in Seattle, and to teach and work in the new department. Dr. Riedel and his charming wife, Marie, arrived early in 1949. An indispensable part of our team, Dr. Riedel. Very unfortunately, before the first class started, Dr. Milton Fisher of Tacoma passed away very suddenly. It was a great loss to our Study Club and to the new teaching faculty.

In April of 1949, the first class was started. The members were Drs. William Gilmore of Yakima, Kenneth Kahn of Seattle, Kenneth Orman of Texas and William Takano of Seattle. At one of the first meetings with the new group a very frightening incident occurred. How well I recall it. We were seated around a large oak lab table talking, when without warning, an earthquake struck. I yelled, "Get under the table." The quake lasted at least 30 seconds or more and when it stopped, a group of really frightened men crawled out from under the table to find one man frozen in his chair - he hadn't gotten under the table like the rest of us had. He said he was "too frightened". We were all pretty well shook up. It was my first, and I hope last, experience of that particular kind with Mother Nature.

The second half of the first class started in October of 1949 and these men included Drs. Alfred Baum of Los Angeles, California, Gerald Dohner of Seattle, Dan Empenger of Seattle, Robert Lande of California, Ben Petriatis of Chicago and Milton Yellen of Houston, Texas. The first four men graduated in June of 1950 and the second half of the first group finished in December of 1950. These 10 men were our first class, our first graduates, and our first alumni.

As the saying goes, "News travels fast". It did, as far as the Orthodontic Department of our School is concerned. It was only a very few years before the Department was literally swamped with applications for enrollment. Applications came from most areas of the nation and increasingly from abroad. The days when it was necessary to look for students was long gone. Each class was limited to eleven men and there was little difficulty in meeting that quota. It was natural for the Department to try and select men with high grade standards and good all around records from their previous dental education. This was carefully done.

One evening in December when the faculty was making their selection of a new class for the following fall, Dr. Moore arrived with a large cardboard box full of applicant folders. He casually reached into the box and drew out 37 folders of applicants who had practically straight A grades. Pick out any 11 men from this group and you have a class for next year was his suggestion. That may have been the year that there were over 150 applicants to choose from. It was near midnight before a class was chosen.

One can hardly consider the growth and development of the Department without mentioning two or three men who have had a profound influence on its progress. It was a lucky break for Washington when Ben Moffett chose to cast his lot with us and orthodontics. Ben Moffett, Ph.D. had, for several years, taught anatomy in several medical schools here in the U.S.A. and abroad. He apparently saw a great opportunity in the research field of orthodontics and the **University of Washington**. His direction over research, his counseling and help to students has been one of the bright spots in the Department over the last 15 years.

Another man who has made his influence widely felt was Clifford Freehe. As an artist, a photographer as well as a

PAUL D. LEWIS

Paul Lewis (R) with Emery Fraser
at 1990 Alton Moore
Lectureship

developer of photographic technic and equipment, Cliff probably has had few peers in his field of work. He has lectured and given courses on clinical photography in many cities here in the U.S.A. as well as abroad. The excellent photographs the students produce each year is mute evidence of his abilities in his field.

In 1966, Dr. Moore was made Associate Dean of the School of Dentistry. This was in recognition of his great ability as an administrator as well as the fact that he had repeatedly handled so many responsibilities in the Dental School, in addition to those of the Orthodontic Department. It was at that time that Dr. Riedel assumed the duties as the Chairman of the Department. The Department continued to develop and grow under Dr. Riedel's capable leadership.

Over the years since the Department's beginning in 1948, an outstanding group of men have completed the 22 months course at the **University of Washington** - men from all parts of the U.S.A. as well as from many nations abroad. Many former Washington students have become associated as teachers with orthodontic departments in other universities, and a few have become department chairmen. Dr. Helga Zimmerman from Germany held the honor of being our first female student, and an excellent student she was. One could hardly have asked for more from this young lady. Since then, we have had two more charming female students.

Dr. Donald Joondeph, a graduate of **Northwestern University of Chicago**, came to the **University of Washington** in 1969 on a postdoctoral fellowship. After completing this course he remained here at the University and in 1971 he was made an Assistant Professor in the Department.

Dr. Riedel, who had been Chairman for nearly 10 years, turned over the Chairmanship to Dr. Joondeph in 1975. Affairs in the Department continue to roll along very smoothly under Dr. Joondeph's guidance. The continuing success of the Department has, in great part, been due to the untiring efforts of these three men, Drs. Alton Moore, Richard Riedel, and Donald Joondeph. Dr. Riedel, in addition to his work in the Orthodontic Department, is also Associate Dean of the School of Dentistry.

After so many years of almost constant work at the University, Dr. Moore in 1976 enjoyed a year's sabbatical leave in Europe. His headquarters was at Nymegen, The Netherlands, where he was associated with Professor Frans Van der Linden and his school in Nymegen. Despite a busy schedule of lecturing at the **University of Nymegen**, Dr. and Mrs. Moore enjoyed visiting many parts of Europe.

During the latter part of his stay abroad, Dr. Moore received the news that he had been appointed to the Deanship of the **University of Washington School of Dentistry**. It was not exactly of his choosing, but here he is getting tangled affairs straightened out and the ship is sailing smoothly again. We are glad to have the Moores back with us.

And finally, for nearly three decades, I was fortunate to have had the privilege of working with these dedicated students and teachers at the **University of Washington**, for which I have been very grateful."

Paul Lewis

The students, teachers, and Alumni of the University of Washington Department of Orthodontics are all very grateful for your hard work, effort, and dedication in working to build the top quality Orthodontic Department that exists today. Thank you, Paul.

FUTURE EVENTS

1991 ALTON MOORE LECTURESHIP

The 1991 Alton Moore Lectureship will be held on Friday, June 14, 1991 at the Four Seasons Olympic Hotel. The guest speaker will be Harry Dougherty, Chairman and Head of the Orthodontic Department at University of Southern California, Los Angeles, CA, for the past 30 years. Additionally, Dr. Dougherty is a Past President of the Angle Society and a Past President of the A.B.O. The format we plan to follow in 1991 will be similar to the one this past year with Dr. Dougherty making a two-part presentation.

We will honor Paul Lewis by celebrating his 95th birthday at this event.

Mark your calendars now to attend.

NEW NATIONAL STUDY CLUB BEING FORMED

Devek Frech ('88) is working to put together a national study club for young (or "young at heart") orthodontists. He has already been successful in putting together a regional study club group in the Dallas area. As a young orthodontist, Devek feels connecting the diversity of professionals from various parts of the country would be a positive forum. He targets the AAO meeting in Seattle next May as a kick-off for this venture.

If you are interested in participating in this national group or want more information, contact **Devek Frech**, 2700 Midwestern Parkway, Wichita Falls, TX 76308, phone (817) 691-1671.

1993 REUNION

The next Alumni reunion is scheduled for the week of July 25, 1993 in Seattle, WA at the Westin Hotel. Please mark your calendars now and make vacation plans to return to the sunny Northwest to attend this meeting. A diverse program, more time to renew old friendships, and lots of activities are planned for all. More details of the meeting will be coming soon.

If you have any suggestions or comments, please contact either **Doug Cameron** ('71), General Chairman, at (206) 455-1944 or Alumni President, **Dave Rice** ('69) at (206) 232-9600.

We look forward to seeing all of you in Seattle in 1993!

1990 PCSO PHOENIX, AZ

The 54th Annual Session of the Pacific Coast Society of Orthodontists will meet in Phoenix, AZ, November 11-13, 1990. Meetings are scheduled at the Phoenix Civic Plaza and the Hyatt Regency Phoenix.

Program Chairman **Vince Kokich** ('74-F) has arranged a magnificent group of presentations to be made by such respected individuals as **Alan Lowe** (Vancouver, B.C.), **John Rugh** (San Antonio), **William Solberg** (Los Angeles), **Roy Page** (Seattle), **Robert Little** ('70-F - Seattle), **John Casco** (Iowa City), **Lloyd Pearson** (Edina, MN), **Harry Fields** ('77 - Chapel Hill), and **John Artun** (F - Seattle). The theme of the session is "Team Treatment Through Interdisciplinary Care".

The **University of Washington Orthodontic Alumni Association** invites you to attend a cocktail reception on Monday evening, November 12th from 6:00 to 7:30 P.M. at the Hyatt Regency Phoenix.

ATTENTION CLASS OF 1984

A "Class of 1984" Reunion is being planned for the annual AAO meeting in Seattle, May 12-15, 1991. For more information on this event, contact: **Dave Crouch** ('84), 1706 Meridian S. #110, Puyallup, WA 98371 - phone (206) 848-9591.

MARK YOUR CALENDARS

- ☐ Nov 11-13, 1990 - PCSO, Phoenix AZ
- ☐ May 11-15, 1991 - AAO, Seattle, WA
Class of 1984 Reunion
National Study Club Kick-off
- ☐ June 14, 1991 - Alton Moore Lectureship, Seattle, WA
Paul Lewis 95th Birthday Celebration
- ☐ Week of July 25, 1993 - Alumni Reunion, Seattle, WA

FUTURE EVENTS

ETHICS: CORNERSTONE OF THE SPECIALTY AAO - SEATTLE, MAY 11-15, 1991

The **American Association of Orthodontists** wishes to extend an invitation for you to attend its 1991 Annual Scientific Session to be held May 11-15, 1991 in Seattle, WA. The program is unique in that emphasis will be placed on complex orthodontic care requiring an interdisciplinary approach.

An excellent group of speakers with an international reputation have been assembled to address the meeting's theme - **Ethics: Cornerstone of the Specialty**. Topics will include temporomandibular joint dysfunction, orthognathic surgery, early class III correction, functional appliance therapy and orthopedic change, aesthetic advances, questions on stability, openbite, and airway, as well as the impact of periodontal and restorative complications.

A new program segment, the Manufacturer's Forum, has been created for the 1991 Annual Session. This forum will allow additional opportunities for orthodontists to learn about new products and services directly from the manufacturers. Presentations will be limited to 20 minutes by individuals who possess the academic background and/or work experience to serve as experts.

For the convenience of international guests and visitors, skilled interpreters will be present to assist with registration. Approximately one-half of the scientific lecturers will be translated into Japanese and Spanish.

The conference will be held in the new Washington State Convention and Trade Center located in the heart of Seattle. Approximately 12,000 orthodontists, guests, and friends are expected to attend.

The **University of Washington Orthodontic Alumni Association** has arranged for a hospitality suite in the Congress Room of the Four Seasons Olympic Hotel, at 411 University Avenue, only minutes from the Convention Center by foot. Our reception is planned for Tuesday evening, May 14th, from 6:00 until 7:30 P.M.

Dave Turpin ('66) is General Chairman of the Annual Session with **Don Joondeph** ('70) being the Program Chairman.

Everyone is looking forward to seeing each other at this special event. For more information contact **Dave Turpin**, 1268 East Main Street, Auburn, WA 98002, phone (206) 833-5455 or FAX (206) 939-5898.

FUTURE EVENTS

1991 ORTHODONTIC GRADUATE STUDENTS

RICK ELLINGSEN went to Washington State University for his B.S. in Zoology in 1985 after spending most of his life in Spokane, WA. After graduating from W.S.U., Rick entered dental school at the University of Washington where he received his D.D.S. in 1989. While in dental school Rick met and married his wife, Michelle. After receiving her D.D.S., she will enter the graduate endontic program at the University of Washington. When they have both completed their respective programs, they intend to return to Spokane, WA and establish private practices. Their hobbies include volleyball, biking, skiing, softball, and salmon fishing.

RON ELLINGSEN completed high-school in Spokane, WA. In 1985 he graduated with a B.S. in Zoology from Washington State University. Following college he married his beautiful wife, Patty, who is an accountant in Seattle. Ron did his undergraduate dental training here at the University of Washington. Following his residency Ron will return to Spokane and practice with his father, Jim Ellingsen ('65). Despite all his time in Huskeytown, Ron remains a Cougar at heart!

BERNARD LIM was born and raised in Vancouver, British Columbia. He attended the University of the British Columbia for three years of pre dental education. In 1989 he graduated from the University of British Columbia School of Dentistry. After graduation from the Ortho program, he plans to practice in Vancouver B.C.

ZEENY TEJA was born in Kenya. She began her high school education in Kenya prior to going to London in January 1971 where she completed high school in a boarding school. After graduation she entered the London Hospital Medical College for Dental Education. She graduated with a Bachelor of Dental Surgery from the University of London in 1977. In 1978 she passed the Licentiate in Dental Surgery from the Royal College of Surgeons in England. From 1978 to 1984 she was engaged in general practice part-time and community care clinics part-time. She received a Masters Degree in Pediatric Dentistry from the University of London in 1985. From 1985 to 1986 she was employed as a Senior House Officer in the Department of Pediatric Dentistry at the Eastman Dental Hospital. In 1986 she moved back to Kenya to take a position as the 1st Hospital Dentist at the Aga Khan Hospital, Nairobi. This was

a new service being established by this large general hospital. In July of 1987 she came to the United States and entered a one year General Practice Residency at the University of Washington. Upon completion of this she practiced pediatric dentistry at the Children's Hospital and Medical Center in Seattle where she practiced from July 1988 until entering the Department of Orthodontics as a graduate student in June of 1989.

CAMILLE VanDEVANTER attended high-school in Olympia, WA. She graduated with a B.S. in Biochemistry from Western Washington University in 1981. For two years she attended graduate school in Lexington, KY studying nutrition. Then she moved to Austin, TX with her husband, Dutch, where she worked as a nutritionist, then a lab technician for two years. In 1985 she enrolled at the University of Texas Health Science Center at San Antonio. Her husband is currently working as a research scientist in Clinical Cancer Research at Swedish Hospital. They have one son, Travis Conner, who is about 3 1/2 years old. After graduation Camille and her family hope to remain in Western WA.

DAVIS WITT was born and raised in Winchendon, MA. He attended Michigan State University for two years then transferred to the University of Massachusetts at Amherst where he received a B.S. degree in 1985. He completed dental training and a D.M.D. degree at the University of Connecticut Health Center in 1989 where he received the American Orthodontic Association Award and the Pierre Fauchard Academy Award. After completion of his orthodontic training, he plans to enter private practice somewhere in New England. His interests include tennis and snow skiing.
