

UW ORTHODONTIC ALUMNI ASSOCIATION NEWS

DECEMBER 1999

1999 Clinical Update Proves That You CAN Go Back Again - Especially if it's to Ixtapa!

Anyone who attended this year's UWOOA Clinical Update in Ixtapa will tell you there's no better place to get educated than in paradise. With a week filled with fantastic speakers, great topics, excellent food and SUN in March, could you ask for more? No, but attendees got more anyway.... friends got together for local sightseeing, shopping, excursions, and great restaurants. Here are a few memories we'd like to share with you (more on page 2).....

See anyone you know? The whole gang takes a break from the program to enjoy a moment for the camera...

Clinical Update 99'

Jean-Pierre Joho ('71) decides not to give up his day job as he learns how to make clay roof tiles

An all-day countryside excursion started at the beach in Zihuatanejo for (from left) Mike ('75) and Annelle Miroue, Dave Turpin ('66), Bruce Hawley ('77), Karla Green, Rick Garfinkle ('73), Julie Molen, Jean-Pierre Joho ('71), Joni Marts, Claudine Joho, Bruce Molen ('72), and Pat and Greg King

Classmates ('69) and buddies Dave Rice and Ken Norwick enjoy the welcome cocktail party

We don't want to go home! From left Karla Green, Rick Garfinkle ('73), Bruce Hawley ('77), Doug ('83) and Debbie Klein

Gloria Lopez ('81) and husband, Dr. Jorge Oladle, made it a family vacation - and what a beautiful family it is!

When Zihuatanejo calls.... From right, Bruce ('72) and Julie Molen joined Joni & Boyd Marts for refreshments and pesole stew (don't ask what's in it...)

Message from the UWOAA President - Bruce Hawley

Greetings to all of our alumni and friends from the Officers and Board of Directors of the University of Washington Orthodontic Alumni Association! I am pleased to report that the state of our organization continues to be excellent, with fine leadership both individually and collectively from your Board. As we look forward to leading the Association into the millennium, it may be appropriate first to take a look back over the past year.

A definite highlight for us was the successful Clinical Update this past March in Ixtapa, Mexico. This meeting seemed to outdo all previous ones, with an outstanding scientific program presented by several of our faculty and alumni members. As was the case for the previous Update, Ixtapa is an ideal resort, and our attendees could hardly have wished for more in the way of sun, beach, cuisine, and a marvelous hotel setting in the Westin Brisas. As usual, the camaraderie and fellowship were terrific.

At our annual Moore Lectureship in June, the graduating seniors presented outstanding synopses of their research investigations on a variety of different topics, illustrating without doubt that our Department is in the forefront of orthodontic research and education. Vince Kokich, our featured speaker, discussed "ABO Standards and Adult Orthodontics: Are They Compatible?" In superlative fashion, Vince outlined the compatibility of applying standards of finishing to the treatment of adult orthodontic patients with periodontal and restorative problems.

Our reception at the AAO meeting in San Diego this past spring was well attended, with delicious hors d'oeuvres and wonderful collegiality.

In an effort to better include current graduate students in our orthodontic family, several members of the Board met with senior students this fall to explain what our organization is about and the history behind the overall feeling of goodwill in our organization. This informal luncheon get-together was well received and will be repeated in the future.

Our next calendar year promises to be significant. The AAO meeting in Chicago in the spring will combine with the World Federation of Orthodontists meeting, so a large turnout is expected. Please make plans to attend the UWOAA reception, which will be held on Saturday evening, April 29. You can look forward to great food and fellowship - a splendid time is guaranteed for all!

This coming June 9 will mark the 20th annual Alton W. Moore Lectureship, which, because of the lengthening of the graduate program to 30 months, will be the last to take place in June (subsequent Moore lectureships will be moving to an autumn date). The Y2K Lectureship will coincide with the 50 year mark of our first graduating class in 1950.

We are thrilled to announce that our keynote speaker will be none other than Al Moore, who will be giving us his perspectives on Orthodontics and our Department over the years. Additional presentations by Don Joondeph and Peter Shapiro will add to this wonderful program - a once in a lifetime event you won't want to miss!

We have already begun planning for our next Reunion, which will be held a year and a half from now, in the summer of 2001 in Seattle. As for all of our Association's events, this will be both a "class" as well as a "world-class" event. Look for registration materials next fall.

I never cease to be impressed by the loyalty and generosity of our alumni. We continue to have a high level of participation with both annual dues and contributions to our Endowment Fund, which allows us to support the department in research, equipment and many other ways.

Our organization, while relatively small in number, is incredibly strong in spirit and assets. Thanks to your participation, the UWOAA has been able to provide quality events and services for its members, as well as support to the Department that would otherwise not be possible. Best wishes for the coming year, and I look forward to seeing you and visiting with you in the months to come.

Message from the Department Chairman - Greg King

Several exciting things will be happening in the Department in the coming months. On December 8th and 9th, Bjorn Zaczrisson will be here as the 1999 Kokich-Shapiro Lecturer. He will spend two full days interacting informally and exclusively with the graduate students. This format has always been one of the high points of the year for the orthodontic graduate students. In addition, this year, Professor Zachrisson will be offering a one-day course to the community of orthodontists on esthetics (December 10). Contact CDE if you are interested.

This year, the Moore Lecture and Thesis Day will be on June 9th. It will be a very special day for several reasons. The 1999 graduates will be the last class on the 8-quarter curriculum. Because of the switch to a 10 quarter curriculum in 2000, Thesis Day and the Moore Lecture can no longer take place in June but instead must move to the latter part of the Fall Quarter. We are trying to increase our chances for good weather and to avoid the holidays, so it looks like the best choice will be October. This timing should permit good presentations at Thesis Day with ample extra time available for the graduates to make finishing touches on their theses before the December deadline. This should also alleviate the "last minute rush" that we are certain everyone remembers from his or her student days.

This year will also be the 20th anniversary of the Moore Lecture. Al Moore has consented to give this very special lecture. Most of us know that Al is fond of great stories about orthodontics, especially in the early days. So I urge you not to miss this opportunity to learn a little more about your heritage as a UW orthodontist. We hope to make this a very special day with Al, Peter Shapiro, and Don Joondeph, so stay tuned.

A few months ago, the UW School of Dentistry was notified by NIH that it would be one of three dental schools nationwide to receive a comprehensive center for oral health research. These represent \$7 million dollars of federal funding for research over 5 years. The most exciting part of this for us is the UW Center theme—"The basis of oral and craniofacial health and susceptibility to disease: a focus on the child as a key to lifelong oral health." I'm sure that I do not have to tell you that this theme has particular significance for us as orthodontists. In addition to funding research projects proposed by departmental faculty (e.g., distraction osteogenesis, suture biology), we also hope to develop other new areas of research activity under the center theme (e.g., quality of life assessments, increasing access to orthodontic treatment). The importance of this Center for the School and Department in the coming decade cannot be over-emphasized. It will define us as the leader in children's oral health research worldwide.

Another exciting recent development involves the Invisalign appliance. You have probably heard about this new approach to using a series of computer generated positioners to treat minor malocclusions. We have been funded by Align Technologies to conduct a clinical trial designed to examine issues related to material consistency and rate of reactivation. This will give us the opportunity to develop expertise with this approach to treatment, as well as to participate directly in its development.

LET'S CATCH UP

Richard Frei ('58) retired in Sept. 1997 after 39 years of treating the greatest group of children and adults. Susie and I celebrated our 50th wedding anniversary with 12 days in Ireland. This is my 16th semester at Ms. San Antonio College studying math, computer graphics, art courses and architecture!"

Andres de la Cruz ('92) announces that "1999 has brought a special new addition to our family. Our children, Esteban and Juliana, my wife Maripaz, and I announce the birth of our daughter Andrea, May 3, 1999. She is doing great!"

Wow! Talk about millenium plans! **William Wise ('58)** will be in Hawaii attending daughter Elizabeth's wedding on December 31st. Will is still practicing orthodontics in Dallas. He and Ruthanne have 9 children and 15 (count em - 15!) grandchildren.

John van der Pyl ('72) writes to let us know that he's retired and staying put - why not when it's in beautiful Guam! Happy Retirement, John!

Leslie Will ('82) has been appointed the chair of the Department of Growth and Development at Harvard School of Dental Medicine. The newly consolidated Department includes Orthodontics and Pediatric Dentistry.

Janice Yip ('79) tells us that "I have sold my practice and retired from orthodontics. Now I can finally be a 'wife' and cook for my patient and beloved husband, Stan. On a more serious note, I look forward to finally enjoying a more balanced lifestyle and working on improving my skiing and golf game. The millenium will find Stan and I sipping wine and relaxing in front of the fire in our log home at Whistler."

Robert Kelly ('59) reports that everybody is healthy - and that everybody includes TEN grandchildren!

Paul Ovens ('57) has been traveling - with a capital T. He went to Tunisia and Malta in July, then up the Amazon in October! Another adventure awaits with the pending birth of grandchild #2 in March 2000.

Jeff Kashner ('99) reports that he is busy working at the Puyallup Tribal Health authority (PTHA). Along with this rewarding experience, Jeff works part-time with another UW alum: Dave Rice ('69). Jeff says this gives him "a great opportunity to experience the private practice office!"

The Wolf Family: Gary, Chris, Adam and Lauren

Gary ('81) and Chris Wolf welcomed Lauren Olivia (born on May 27, 1999 and adopted on June 2, 1999) who joins adoring big brother Adam. Chris has less time to play her violin with Lauren's arrival, but still manages to help out with the bookkeeping at Gary's office. She is still running, completing a 10K last month pushing Lauren the whole way. Gary is practicing just 3 to 3 1/2 days a week and enjoying more time for family activities. He is still teaching part-time at Case Western Reserve University, where he directs the early treatment clinic, teaches clinical photography plus an assortment of other topics. He officially became a member of the midwestern component of the Edward H. Angle Society last year. Last summer, Gary traveled to Bangkok to deliver a lecture on the early treatment of Class II and Class III skeletal problems before the Annual General Assembly of the Thai Orthodontic Society.

Rick Garfinkle ('73) shares his heart and expertise every year to great causes. He donates an entire orthodontic treatment to the annual Portland Jewish Academy auction as well as the Mittleman Jewish Community Center auction. With memories of seeing good charity work by others as he grew up, Rick honors those memories with his donations. On the homefront, he and Karla have been working away at a huge home remodel. When's your housewarming Rick? We're all ready to visit!

LET'S CATCH UP

Glenn McMinn ('79) reports that he has sold his practice in Pocatello and Blackfoot, Idaho to Dr. Michael Summers (U. of Minnesota). "I now work as a contract orthodontist in his office 3 days a week for 3 weeks a months. I'm working on casting a fly as well as Stan Hall ('79). I'm still actively involved in church and civic service."

James Hansel ('70) suffered a life threatening heart attack a year ago. Because of this, he sold his practice and retired. However, on the upside, Jim is able to continue his bird carving, so is enjoying taking it a little easier these days. Stay well, Jim - we're looking forward to seeing some pictures of those carvings!

Alfred Baum ('50) reports that he is in part-time practice with two of his three sons in Westwood Village, Los Angeles. Spare time finds him boating with his 5 grandchildren.

Mike ('94) and Annmarie Vermette are all smiles in Ixtapa

Peter ('81) and Elyse Sinclair are the "tired new parents of first child Scott Reynolds sinclair born May 25th, 1999. Scott is already showing observational and manual dexterity skills that bode well for his entry into the class of 2025."

Ken ('84) and Michele Agronin, along with Ashley (age 7) are eagerly awaiting an addition to the family. The baby is due May 12th. Ken's only concern is he may have to miss the Kentucky Derby - he's only missed *one* in 26 years!

Jonathan Perr says "Aloooooohhhaaaaa!"

Diane Doppel ('90) and husband Geoff Perr had a great time in Maui with son Jonathan in September. Diane is planning expansion of her office in February 2000, which will provide a larger waiting room, updated sterilization and front desk

Peter Barwick ('94) and wife Jo-Anne are royally hosted by Nick Vermette, son of Mike ('94) and Annmarie, during their visit to Mike's newly renovated office in Concord, New Hampshire. Mike writes that he enjoyed meeting up with everyone in Ixtapa, as he did with classmates Terry Sullivan and Pete Barwick while at the San Diego AAO meeting

Two at a Time! Barbara and Ted ('65) Thom show off their first grandchildren, Conley & Corinne

LET'S CATCH UP

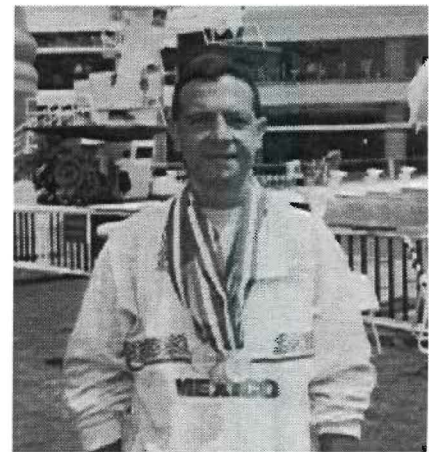

Ken ('95) and Lisa Norwick enjoy the farewell banquet and a spectacular sunset in Ixtapa

Zeeny Teja ('91) experienced a devastating fire in her office last December, which forced her to relocate nearby. She and the staff have been in the new office since May and are gradually settling in. Zeny sends her thanks to everyone for "all your kind messages of support. I sincerely appreciated and needed them!!"

The UWOOA helped organize a summer '99 mini-residency for UW graduate Haruo Ishikawa ('82, bottom row, 2nd from right) and his fellow orthodontists from Japan. Aside from a wonderful scientific program, the group packed in some fun times too. They even managed to take in a Mariner's game at Seattle's brand new Safeco Stadium!

Art Dugoni ('63) continues to be honored for his outstanding contributions. To name a few: Phi Kappa Phi Honor society (U of the Pacific), 1999 International Callahan Memorial Award, selected as 1 of 25 leaders and visionaries by the *Journal of the American Student Dental Association*, honored in Mexico City by the World Dental Federation FDI to the World Dental Federation List of Honour (the highest award of the World Dental Federation and is limited to 30 living individuals who have made distinguished contributions to the World Dental Federation and its mission), American Dental Association Presidential Citation. In addition, The American College of Dentists created the Arthur A. Dugoni Fund of the Endowment of the American College of Dentists Foundation, the first-named fund of the College endowment. Gee whiz, Art, we're almost afraid to ask about your millenium plans!

Amin Ades ('83) reports "a dream come true..." After swimming a year on his own, Amin decided to join the Masters Swimming team. There, he swam 3-4 miles daily to represent Mexico at the July 1999 Panamerican Games. The games were hosted in Mexico City and represented 13 countries worldwide, with approximately 2000 athletes competing in numerous events. We are proud to announce that Amin won 4 medals: 1 silver (200 meters); 1 bronze (100 meter breaststroke); 1 bronze (50 meter breaststroke) and 1 bronze (50 meter backstroke). Amin reports that "it took a lot of effort and work, but it was worth it. Orthodontics is fun, swimming too!" Congratulations Amin! A world-class orthodontist and athlete all in one!

Faculty Profile

Dr. Dave Turpin ('66)

Each year, we use our newsletter to profile individual faculty members at the UW Orthodontic Department. This year, we are happy to feature a member who not only shares his expertise with our graduate students, but with all AJO-DO subscribers as their upcoming Editor-in-Chief: Dr. Dave Turpin.

Dave's professional career spans over 30 years at the UW and 33 years in private practice. He has simultaneously maintained great interest in the editorial process and has put this interest to good work, serving as Editor of the PCSO Bulletin (10 years) and the Angle Orthodontist (11

years). Now Dave will continue his editorial role in a larger and prestigious format with the American Journal of Orthodontics and Dentofacial Orthopedics. In early December 1999, the AJO-DO editorial office will begin operations at its new location in the UW Department of Orthodontics. There, Dave will serve as Editor-Designate along with assistant, Chris Burke, until current Editor-in-Chief, Dr. Tom Graber, completes his final issue in May, 2000. Dave's first turn as Editor-in-Chief will begin with the AJO issue in June, 2000.

Dave's history of successful publication work included innovative thinking with the PCSO Bulletin during his term as Editor. "To improve interviewing and writing skills I established an annual workshop for the magazine's personnel, drawing upon the American Dental Association as well as educational institutions in the area for additional expertise. This effort resulted in a complete redesign of the PCSO Bulletin in 1985, and an increase in both size and content. As a result, we won the Golden Scroll Award from the International College of Dentists for the most improved overall design of a publication that year."

As an Affiliate Professor at the UW, Dave truly enjoys working with the students. He has witnessed phenomenal changes as technology impacts the profession. "During the past two years, the technological abilities of the students have increased dramatically. Students are now accustomed to using computers since junior high, and it's exciting being associated with them."

Given Dave's interest in using technology, it comes as no surprise that he intends to put that interest to good work at the AJO-DO. One of his first jobs during the year 2000 is to bring the journal fully on-line and available to current AAO members at no extra cost. It is anticipated that with the electronic publication of all manuscripts, and a streamlining of production schedules, the time it takes to publish research findings will be shortened. "The increased use of new technology makes this an exciting time to be involved with others in making it work to simplify not complicate our lives. The opportunity to read a scientific paper interactively is something else most clinicians have not yet experienced."

Dave also integrates technology into his busy private practice in Auburn, Washington. Along with associates Heather Woloshyn ('93) and Jacklyn Kurth ('99), he uses video imaging as a standard tool to help patients make decisions regarding their orthodontic treatment. In keeping with his love of writing, for the past 15 years his practice has produced a well-received quarterly newsletter, "Wire Connections."

Dave and his wife, Judy, have three grown children and two grandchildren. Judy is a long-time lobbyist in Olympia working for a number of nonprofit organizations involved with environmental and social service issues. Daughter Barbara is an engineer and on the faculty at Rutgers University in environmental sciences. Son Paul is a professional musician, having spent over 10 years playing with Jumbalassy. He is currently building a new recording studio (Bayside Recording) in Bellingham. Youngest son, Matt, attends graduate school at the UW in Library Information Science.

We are fortunate to know Dave and be a part of his ongoing quest for quality teaching and innovative use of tools in our changing orthodontic community.

Clinical Update 2003 - Where Would YOU Like to Go?

OUR NEXT CLINICAL UPDATE WILL TAKE PLACE IN YEAR 2003

YOU CAN HELP DECIDE WHERE WE WILL MEET!

Everyone who attends our clinical updates enjoys the great education and recreation opportunities of our program. Now we are gearing up for our Clinical Update 2003, and we have narrowed down our choices to two possibilities. They are:

1. Returning to Ixtapa to the Westin Brisas Hotel

All those who go to Ixtapa know the beautiful beaches, great facilities, super shopping, and fun recreation opportunities at the Westin and nearby. This has been a proven success for the last two updates and we want to present it as an option for you now.

2. A Caribbean cruise

How would you like to take a one-week cruise throughout the Caribbean islands? Our program would be designed around the schedule for great ports of call. Anyone who has taken a cruise knows just how great shipboard life can be with entertainment, sightseeing, (yes, golf at ports of call) and, of course, wonderful food.

***Please indicate your choice below AND whether you plan to attend!
This information will help us as we negotiate prices with facilities.
THANK YOU!***

- ☐ I plan to attend if the Clinical Update is in Ixtapa
- ☐ I plan to attend if the Clinical Update is part of a Caribbean cruise
- ☐ I plan to attend either in Ixtapa or the Caribbean

Dr. Vincent O. Kokich Presents at the Alton Moore Lecture

The 1999 Alton Moore Lectureship brought together our own world-renowned speaker, Vince Kokich, with quality presentations by the graduating seniors - including the speaker's son!

Here they are - the Class of 99!

From left are happy graduates Lihfen Huang, Vincent Kokich, Jacklyn Kurth, Jeff Kashner, Tamara Justus, and Andrew Leavitt

Charlie Gilmore ('83) and Barbara Sheller ('87) are all smiles during the morning refreshment break

Department Chair Greg King (l) and Bryan Williams ('79) enjoy the morning

The Kokich's celebrate the day with (from left) Lisa and new graduate Vince O., along with dad Vince ('74) and mom Marilyn

*We look forward to the Alton Moore Lecture, June 9, 2000,
where our graduates will present their research!*

Dr. Vincent O. Kokich Presents at the Alton Moore Lecture

Orthodontic pals are from left Gina Trask ('85), Heather Woloshyn ('93) and Zeeny Teja ('91)

Dave Rice ('69) and Carol Knaup ('93) catch up during a break

Hey ladies! Classmates from 1997, Kara McCullough and Francine Lo meet up again

Speaker Vince Kokich ('74) joins UWOOA President Bruce Hawley ('77) and lecture namesake Alton W. Moore

Perfect smiles - happy folk! From left are guest Rob Merrill, Anne-Marie Bollen (faculty), John Ive ('79), and Doug Ramsay ('90)

Proud parents Roberto ('66) and Yolanda Justus join new graduate Tammy to celebrate the day

Meet Our Year 2000 Graduates!

Jennifer Ashmore graduated from the University of California San Diego, then moved to Ann Arbor to attend dental school at the U. of Michigan. There, Jennifer was a member of the student government, many organizations including the Delta Sigma Delta dental fraternity. She has maintained an active philanthropic and volunteer life with such organizations as the Alzheimer's Association, Head Start dental program, Migrant Farmworkers Dental Service, Jonathan Taft Dental-Community Dental Education, and Pierre Fauchard. Jennifer and Bremerton fire fighter husband, Robert, look forward to making their home on the Olympic Peninsula after Jennifer's graduation. They take advantage of great Pacific Northwest outdoor opportunities such as hiking, camping, and snow skiing whenever possible.

Jorge Castillo hails from Lima, Peru. He finished dental school at the Peruvian University Cayetano Heredia in Lima. Jorge comes from a family of dentists (father, mother, two sisters and two brothers-in-law). After he finished dental school, he came to the US to do a graduate program in Pediatric Dentistry and a Master in Dental Sciences at the University of Connecticut. Subsequently, Jorge worked with his father, a pediatric dentist, (who graduated from Eastman Dental Center) at their office in Lima for 3 years and then to came to the UW. His main research interest is in prevention and his research project has to do with fluoride varnishes. Jorge is planning to go back to Lima after graduation to practice with his sister, another U.S. orthodontic graduate.

Hailing from the Midwest, **Geoff Greenlee** is a Northwest convert. After graduating from the University of Michigan in Ann Arbor with both his B.S. and D.D.S., Geoff made the cross country journey to Seattle. With outdoor interests spawned in the woods of the Upper Peninsula of Michigan, Geoff enjoys being surrounded by mountains and ocean. Other hobbies include athletics and music. Geoff's scientific interests include craniofacial anomalies and his research subject is cranial skeletal effects of fetal alcohol syndrome. Geoff's future plans involve associating with another orthodontist in the Seattle area and enjoying all the city and surroundings have to offer.

Cory Liss was born and raised in the ice and snow of Calgary, Alberta, where he spent most of his free time playing hockey. After three years at the junior level, Cory had decided to pursue other interests. He attended the University of Calgary for three years, and then moved on to dental school at Northwestern University in Chicago. Now in Seattle, Cory tries to spend his free time pursuing the many outdoor activities the area has to offer. Other interests include sports, travel and photography. Cory's research interest lies in bone and its effect on apical root resorption. After graduation, Cory plans to return home to Calgary to pursue a position in private practice.

Elizabeth Lyons was born and raised in Syracuse, NY. In a combined program, she earned a BA degree in Physics from State University at New York and BS degree in Biomechanical Engineering from Columbia University. Elizabeth worked as a product development engineer with Procter and Gamble Company in Cincinnati, OH. There, she conducted clinical testing for the Crest Complete toothbrush. Working closely with clinical research dentists convinced Elizabeth to pursue a career in dentistry. She returned to NY for dental school at the State University of New York at Stony Brook. Wanting to apply her engineering background to dentistry, Elizabeth developed an interest in orthodontics. Acceptance to the University of Washington program provided an excellent opportunity for Elizabeth, and allowed her husband to return to his native home in the Northwest. After graduating from the UW in June, Elizabeth is hoping to work in the Seattle/eastside region. Outside of school, Elizabeth enjoys cooking, reading, and weekends filled with downhill skiing, boating, hiking or travel.

Steve Noxon was born and raised in Rochester, New York. After brief consideration of engineering and a backpack trip through Africa, Steve decided to pursue "people rather than instruments." At the U. of Connecticut Dental School, Steve studied bone remodeling and deciduous tooth exfoliation. He was most moved, however, volunteering with the Special Olympics. There he headed a screening tent and worked with over 250 athletes, educating them about oral hygiene and checking out dental and health problems. Steve fell in love with Seattle and has "traded in my soccer cleats for hiking boots, skis and snow shoes." In fact, he became engaged on the summit of Mount St. Helens! He and his fiancé will return to New England to get married and settle down. Steve says he will sorely miss the many aspects of Seattle as he returns "home" to the northeast.

Marcia Younger was born in Flint, Michigan, and raised in Dayton, Ohio. She spent her teenage years dancing with a ballet company in Dayton, Ohio, aspiring to dance with a professional company. Injuries prevented her from following her dreams of becoming a professional ballerina. Marcia received her Bachelor of Science in Nursing from Clemson University in 1990. Before entering dental school she worked full time both in trauma and open heart intensive care as a registered nurse for four years and part time during her four years of dental school. She received her Doctor in Dental Surgery from Ohio State University in 1998. Upon completion of her dental degree she moved and entered the graduate program at the University of Washington to specialize in orthodontics. She is planning on pursuing private practice somewhere on the west coast.

MARK YOUR CALENDARS

April 29, 1999	UWOAA Reception at AAO, Chicago
June 9, 1999	20th Anniversary Alton Moore Lectureship, Seattle
October 1-4, 2000	PCSO Annual Session, Reno

Your Officers & Board of Directors

Officers

President	Bruce Hawley ('77)
President-Elect	Timothy Shields ('83)
Secretary-Treasurer	Charles Gilmore ('83)
Past-President	Doug Cameron ('71)

Department Chair	Greg King
Executive Director	Joni Marts

Board of Directors

Ward Damon ('75)
Diane Doppel ('90)
Carol Knaup ('93)
Doug Knight ('95)
Bruce Molen ('72)
Bryan Williams ('79)
